Odisea nº 16 Susana Nicolás Román, 2016-05-05 *Revista de Estudios Ingleses* es un anuario dirigido y gestionado por miembros del Departamento de Filología Inglesa y Alemana de la Universidad de Almería con el propósito de ofrecer un foro de intercambio de producción científica en campos del conocimiento tan diversos como la lengua inglesa, literatura en lengua inglesa, didáctica del inglés, traducción, inglés para fines específicos y otros igualmente vinculados a los estudios ingleses.

The New Working Class Ainsley, Claire, 2018-10-31 Recent events such as the Brexit vote and the 2017 general election result highlight the erosion of traditional class identities and the decoupling of class from political identity. The majority of people in the UK still identify as working class, yet no political party today can confidently articulate their interests. So who is now working class and how do political parties gain their support? Based on the opinions and voices of lower and middle income voters, this insightful book proposes what needs to be done to address the issues of the 'new working class'. Outlining the composition, values, and attitudes of the new working class, it provides practical recommendations for political parties to reconnect with the electorate and regain trust.

Transforming Undergraduate Education in Science, Mathematics, Engineering, and Technology Committee on Undergraduate Science Education, Board on Science Education, Division of Behavioral and Social Sciences and Education, National Research Council, 1999-04-08 Today's undergraduate students--future leaders, policymakers, teachers,

and citizens, as well as scientists and engineers--will need to make important decisions based on their understanding of scientific and technological concepts. However, many undergraduates in the United States do not study science, mathematics, engineering, or technology (SME&T) for more than one year, if at all. Additionally, many of the SME&T courses that students take are focused on one discipline and often do not give students an understanding about how disciplines are interconnected or relevant to students' lives and society. To address these issues, the National Research Council convened a series of symposia and forums of representatives from SME&T educational and industrial communities. Those discussions contributed to this book, which provides six vision statements and recommendations for how to improve SME&T education for all undergraduates. The book addresses pre-college preparation for students in SME&T and the joint roles and responsibilities of faculty and administrators in arts and sciences and in schools of education to better educate teachers of K-12 mathematics, science, and technology. It suggests how colleges can improve and evaluate lower-division undergraduate courses for all students, strengthen institutional infrastructures to encourage quality teaching, and better prepare graduate students who will become future SME&T faculty.

Central Borneo Jérôme Rousseau, 1989-12-31 This comparative study of the peoples of central Borneo provides a detailed description of a pre-colonial society. Rousseau analyzes an ethnically diverse region and unravels the relationship between ethnicity, social organization, language, and culture among its peoples.
