The Film Experience Timothy Corrigan, Patricia White, 2012-01-03 A comprehensive introduction to film that recognizes students as movie fans and helps them understand the art form's full scope. The authors situate their strong coverage of the medium's formal elements within the larger cultural contexts that inform the ways we watch film, from economics and exhibition to marketing and the star system. -- Blackwells.

Videogames and Horror Dawn Stobart, 2019-10-01 Videogames are full of horrors – and of horror, a facet of the media that has been largely overlooked by the academic community in terms of lengthy studies in the fast-growing field of videogame scholarship. This book engages with the research of prominent scholars across the humanities to explore the presence, role and function of horror in videogames, and in doing so it demonstrates how videogames enter discussion on horror and offer a unique, radical space that horror is particularly suited to fill. The topics covered include the construction of stories in videogames, the role of the monster and, of course, how death is treated as a learning tool and as a facet of horror.

Latin American Documentary Film in the New Millennium María Guadalupe Arenillas, Michael J. Lazzara, 2016-06-23 Nearly two decades into the new millennium, Latin American documentary film is experiencing renewed vibrancy and visibility on the global stage. While elements of the combative, politicized cinema of the 1960s and 1970s remain, the region's production has become increasingly subjective, reflexive, and experimental, though perhaps no less political. At the same time, Latin American filmmakers both respond to and shape global tendencies in the genre. This book highlights the richness and heterogeneity of Latin American documentary film, surveys a broad range of national contexts, styles, and practices, and expands current debates on the genre. Thematic sections address the “subjective turn” of the 1990s and 2000s and the move beyond it; the ethics of the encounter between the filmmaker and the subject/object of his or her gaze; and the performance of truth and memory, a particularly urgent topic as Latin American countries have transitioned from dictatorship to democracy.

A Theory of Narrative F. K. Stanzel, 1986-03-13 The purpose of this book is to provide a clear and systematic account of the complexities of fictional narration which result from the shifting relationship in all storytelling between the story itself and the way it is told.

The Routledge Companion to Video Game Studies Mark J.P. Wolf, Bernard Perron, 2014-01-03 The number of publications dealing with video game studies has exploded over the course of the last decade, but the field has produced few comprehensive reference works. The Routledge Companion to Video Game Studies, compiled by well-known video game scholars Mark J. P. Wolf and Bernard Perron, aims to address the ongoing theoretical and methodological development of game studies, providing students, scholars, and game designers with a definitive look at contemporary video game studies. Features include: comprehensive and interdisciplinary models and approaches for analyzing video games; new perspectives on video games both as art form and cultural phenomenon; explorations of the technical and creative dimensions of video games; accounts of the political, social, and cultural dynamics of video games. Each essay provides a lively and succinct summary of its target area, quickly bringing the reader up-to-date on the pertinent issues surrounding each aspect of the field, including references for further reading. Together, they provide an overview of the present state of game studies that will undoubtedly prove invaluable to student, scholar, and designer alike.

Faith, Film and Philosophy R. Douglas Geivett, James S. Spiegel, 2009-09-20 Those who tell stories rule society. Plato So who today are our principal storytellers? Not philosophers, but filmmakers. For those who know both the enormous entertainment potential and the culture-shaping power of film, this book will stir mind and imagination. For great stories freight world-sized ideas, ideas worthy of contemplation and conversation. Great cinema inspires wonder. But another philosopher, Aristotle, reminds us that wonder is the true source of philosophy. So perhaps Plato or Aristotle might have a shot at ruling society, even today--if they took an interest in film. These fourteen essays consider classic and current films together with several major philosophical themes, all within the context of Christian faith: (1) the human condition, (2) the human mind and the nature of knowing, (3) the moral life, and (4) faith and religion. Citizen Kane, Big Fish and Pretty Woman contribute to an in-depth consideration of the human condition. The Truman Show, The Matrix, Being John Malkovich and It's a Wonderful Life, among others, illuminate reflection on the human mind and the nature of knowing. Looking at the moral life, contributors interact with such notable films as Pleasantville, Bowling for Columbine, Mystic River and The Silence of the Lambs. The final section pursues the theme of faith and religion traced through a number of Hong Kong martial arts films, Contact, 2001: A Space Odyssey and U2's music documentary Rattle and Hum. A veritable film festival for all those who want to nurture the wonder of philosophical inquiry and the love of Christian theology through an engagement with the big ideas on the big screen.

The Natural Problem of Consciousness Pietro Snider, 2017-06-12 The "Natural Problem of Consciousness" is the problem of understanding why there are presently conscious beings at all. Given a non-reductive naturalist framework taking consciousness as an ontologically subjective biological phenomenon, how can we rationally explain the fact that the actual world has turned out to be one where there are presently living beings that can feel, rather than having developed as a

zombie-world in which there would be no conscious experiences of any kind? This book introduces the Natural Problem by relating it to central problems in the philosophy of mind (metaphysical mind-body problem, Hard Problem of consciousness) and emphasizing the distinctive interest of its diachronic dimension. Ranging from philosophy to biology and neuroscience, it offers a thorough analysis aimed at better understanding what could explain why phenomenal consciousness has been preserved throughout evolution by natural selection. This is an original, engaging, and thought provoking philosophical study of a neglected but fundamental question regarding the nature and origin of consciousness.

Playful Materialities Benjamin Beil, Gundolf S. Freyermuth, Hanns Christian Schmidt, Raven Rusch, 2022-09-22 Game culture and material culture have always been closely linked. Analog forms of rule-based play (ludus) would hardly be conceivable without dice, cards, and game boards. In the act of free play (paidia), children as well as adults transform simple objects into multifaceted toys in an almost magical way. Even digital play is suffused with material culture: Games are not only mediated by technical interfaces, which we access via hardware and tangible peripherals. They are also subject to material hybridization, paratextual framing, and processes of de-, and re-materialization.

Movies and Meaning Stephen Prince, 2001 Movies and Meaning is a comprehensive introduction to the film industry that focuses on three topics: how movies express meanings, how viewers understand those meanings, and how cinema functions globally as both an art and a business. It examines both how filmmakers create images and sounds and the mechanisms and processes by which viewers make sense of images and stories on screen.

Screenplay Geoff King, Tanya Krzywinska, 2002 Hollywood film franchises are routinely translated into games and some game-titles make the move onto the big screen. This collection investigates the interface between cinema and games console or PC.

Film as Literature, Literature as Film Harris Ross,1987-06-11 This work discusses the relationship between film and literature, explaining and evaluating the issues most frequently raised on the subject. It also lists nearly 2,500 articles and books published from 1908 to 1985 on the comparison of film to drama, fiction, and poetry. These comparisons arose shortly after the first appearance of moving pictures as writers attempted to establish the differences between movies and drama. The study has since grown into a significant scholarly concern.

Get Real Philip Zhai,1998-05-29 Is virtual reality merely a video game that consumes and distracts the player immersed in its simulations? Or is it an immaterial world, rich in meaning, beckoning people to a better future world inside computers? In *Get Real: A Philosophical Adventure in Virtual Reality*, Philip Zhai tackles these questions with keen logical analysis and concludes by advocating a stance that transcends these two opposing view of virtual reality. Zhai argues that the combination of three technologies-digital simulation, sensory immersion, and functional teleoperation-in a well-coordinated manner amounts to a re-creation of the whole empirically perceived universe. His analysis of the nature and significance of this re-creation is eye-opening and completely original. This book will be invaluable to philosophers of science, philosophers of mind and anyone interested in technology's growing impact on our lives and minds. The thought experiments in the book are mind-stretching and enlightening, and make abstract concepts interesting and tangible.
