Effects of the Second Language on the First Vivian Cook, 2003-02-14 This book looks at changes in the first language of people who know a second language, thus seeing L2 users as people in their own right differing from the monolingual in both first and second languages. It presents theories and research that investigate the first language of second language users from a variety of perspectives including vocabulary, pragmatics, cognition, and syntax and using a variety of linguistic and psychological models.

First and Second Language Acquisition Jürgen M. Meisel, 2011-07-07 Infants and very young children develop almost miraculously the ability of speech, without apparent effort, without even being taught - as opposed to the teenager or the adult struggling without, it seems, ever being able to reach the same level of proficiency as five year olds in their first language. This useful textbook serves as a guide to different types of language acquisition: monolingual and bilingual first language development and child and adult second language acquisition. Unlike other books, it systematically compares first and second language acquisition, drawing on data from several languages. Research questions and findings from various subfields are helpfully summarized to show students how they are related and how they often complement each other. The essential guide to studying first and second language acquisition, it will be used on courses in linguistics, modern languages and developmental psychology.

First Language Influences on Multilingual Lexicons Paul Booth, Jon Clenton, 2020-02-26 This collection brings together recent research on the influences between first and additional languages with a focus on the development of multilingual lexicons. Featuring work from an international group of scholars, the volume examines the complex dynamics underpinning vocabulary in second and third languages and the role first languages play within this process. The book is organized around three different facets of research in this area - lexical recognition, processing, and knowledge; the effects of first languages on second language reading and writing, collocations, and translation skills; and, vocabulary testing - drawing on examples from a variety of languages, including European languages, Arabic, and Japanese. Setting the stage for further research on the interplay between first languages and multilingual lexicons, this volume is key reading for students and researchers in applied linguistics, language learning and teaching, bilingualism, second language acquisition, and translation studies.

Bilingualism through the Prism of Psycholinguistics Mikel Santesteban,Jon Andoni Duñabeitia,Cristina Baus,2023-09-01 Professor Albert Costa (1970-2018) was one of the most influential scholars in the fields of psycholinguistics and bilingualism. This book provides a faithful look at the most relevant lines of research in which he worked during his academic career. Written by some of his close collaborators and friends, the book presents a coherent summary of the most relevant psycholinguistic theories on language processing and bilingualism, including critical reviews to current models of lexical access, the representation of cognate words, neurolinguistic models of bilingualism, cross-linguistic effects in bimodal bilinguals (sign language), prediction processes and linguistic alignment in bilinguals, the influence of foreign-language effects in social cognition and the effects of bilingualism in emotion and decision making processing. This volume is a tribute to Prof. Costa and his work, and is born from a deep love and respect for his way of approaching the science of multilingualism from a psycholinguistic perspective.

Language and Linguistics in Context Harriet Luria,Deborah M. Seymour,Trudy Smoke,2012-12-06 Taking a sociocultural and educational approach, *Language and Linguistics in Context: Readings and Applications for Teachers*: *introduces basic linguistic concepts and current perspectives on language acquisition; *considers the role of linguistic change (especially in English) in the politics of language; *acknowledges the role of linguists in current policies involving language; *offers insights into the relationship between the structure of language systems and first- and second-language acquisition; the study of language across culture, class, race, gender, and ethnicity; and between language study and literacy and education; and *provides readers with a basis for understanding current educational debates about bilingual education, non-standard dialects, English only movements, literacy methodologies, and generally the importance to teaching of the study of language. The text is organized into three thematic units - What is Language and How is It Acquired?; How Does

Language Change?; and What is Literacy?. To achieve both breadth and depth – that is, to provide a “big picture” view of basic linguistics and at the same time make it specific enough for the beginner – a selection of readings, including personal language narratives, is provided to both introduce and clarify linguistic concepts. The readings, by well-known theoretical and applied linguists and researchers from various disciplines, are diverse in level and range of topics and vary in level of linguistic formalism. Pedagogical features: This text is designed for a range of courses in English and language arts, bilingualism, applied linguistics, and ESL courses in teacher education programs. Each unit contains a substantive introduction to the topic, followed by the readings. Each reading concludes with Questions to Think About including one Extending Your Understanding question, and a short list of Terms to Define. Each unit ends with additional Extending Your Understanding and Making Connections activities that engage readers in applying what they have read to teaching and suggested projects and a bibliography of Print and Web Resources. The readings and apparatus are arranged so that the material can be modified to fit many course plans and schemes of presentation. To help individual instructors make the most effective use of the text in specific classes, a set of matrixes is provided suggesting configurations of readings for different types of linguistics and education classes.

First Language Use in Second and Foreign Language Learning Miles Turnbull, Jennifer Dailey-O'Cain, 2009 This book focuses on the use of the first language in communicative or immersion-type classrooms. Through the intersection of theory, practice, curriculum and policy, the volume calls for a reconceptualization of code-switching as something that both proficient and aspiring bilinguals do naturally, and as a practice that is inherently linked with bilingual code-switching.

Language and Culture Karen Risager,2006-01-01 The book presents a new theory of the relationship between language and culture in a transnational and global perspective. The fundamental view is that languages spread across cultures, and cultures spread across languages, or in other words, that linguistic and cultural practices flow through social networks in the world along partially different paths and across national structures and communities.

Learning to Write Aviva Freedman,Ian Pringle,Janice Yalden,2014-09-25 First published in 1983. The present volume holds the selected papers of a symposium on CCTE Conference, held in 1979 in Ottawa, Canada. The content provides an introduction and a review of major themes in Writing research and pedagogy. This is in part achieved by the papers themselves, and in part by the introductions the Editors offer to each of the four Parts. Second, the reader is continually presented with a characteristic applied linguistic interplay of research and practice, each affecting the other, in a mutual and interactive manner. Third, the issues of 'Writing as Product versus Writing as Process', or 'The Teaching of Writing Skills versus the Development of Writing Abilities' or 'The Use of Writing for Learning and Knowing' are not merely issues affecting Writing alone but language learning and teaching as a whole, and one might add, the entire process of education.

First Language Acquisition David Ingram,1989-09-07 This major textbook, setting new standards of clarity and comprehensiveness, will be welcomed by all serious students of first language acquisition. Written from a linguistic perspective, it provides detailed accounts of the development of children's receptive and productive abilities in all the core

areas of language - phonology, morphology, syntax and semantics. With a critical acuity drawn from long experience, and without attempting to offer a survey of all the huge mass of child language literature, David Ingram directs students to the fundamental studies and sets these in broad perspective. Students are thereby introduced to the history of the field and the current state of our knowledge in respect of three main themes: method, description and explanation. Whilst the descriptive facts that are currently available on first language acquisition are central to the book, its emphasis on methodology and explanation gives it a particular distinction. The various ways in which research is conducted is discussed in detail, as well as the strengths and weaknesses of various approaches, leading to new perspectives on key theoretical issues. First Language Acquisition provides advanced undergraduate and graduate students alike with a cogent and closely analysed exposition of how children acquire language in real time. Equally importantly, readers will have acquired the fundamental knowledge and skill not only to interpret primary literature but also to approach their own research with sophistication.
