Play and STEM Education in the Early Years Sue Dale Tunnicliffe, Teresa J. Kennedy, 2022-06-16 This edited book provides an overview of unstructured and structured play scenarios crucial to developing young children's awareness, interest, and ability to learn Science, Technology, Engineering and Mathematics (STEM) in informal and formal education environments. The key elements for developing future STEM capital, enabling children to use their intuitive critical thinking and problem-solving abilities, and promoting active citizenship and a scientifically literate workforce, begins in the early years as children learn through play, employing trial and error, and often investigating on their own. Forty-seven STEM experts come together from 16 countries (Argentina, Australia, Belgium, Canada, England, Finland, Germany, Israel, Jamaica, Japan, Malta, Mauritius, Mexico, Russia, Sweden, and the USA) and describe educational policies and experiences related to young learners 3-4 years of age, as well as students attending formal-nursery school, early primary school, and the early years classes post 5 years of age. The book is intended for parents seeking to provide STEM activities for their children at home and in playgroups, citizen scientists seeking guidance to provide children with quality educational activities, daycare practitioners providing educational structures for young children from birth to formal education, primary school teachers and preservice teachers seeking to teach preschool, kindergarten or children typically aged 5-8 years old in grades 1-3, as well as researchers and policy makers working in science didactics with small children.

Reformas educativas en un Estado federal Guillermo Ramón Ruiz, 2024-01-29 En este libro se analiza la ejecución de las reformas educativas en ocho jurisdicciones provinciales de las cinco regiones educativas que tiene la Argentina, principalmente en el plano curricular. La pregunta que guía esta indagación es: ¿qué efectivamente se ha reformado en la educación argentina en los cuarenta años de democracia? Para ello, la escala de análisis es subnacional y -con un criterio federal-; se trata de interpretar el rol del Estado federal y de las capacidades diferenciales de los Estados provinciales analizados. La cuestión de las diferencias en el Estado federal y cómo ello cercena el principio de igualdad -que está en la base del derecho a la educación- es puesta en evidencia, discutida y problematizada, aunque no necesariamente respondida. Se complementa el estudio con datos sociodemográficos. Luego de 40 años de gobiernos democráticos y una profusa labor parlamentaria en materia educativa, la desigualdad evidenciada por los indicadores de cobertura y rendimiento reflejan diferencias más profundas, sobre todo en el plano curricular. Ello afecta a las condiciones y a las estrategias de enseñanza y

ciertamente impacta sobre los aprendizajes de la población escolar. Analizar esas limitaciones a partir de las políticas curriculares en el Estado federal, así como los procesos de traducción de los lineamientos federales que se evidencian en los niveles subnacionales y también algunos de los resultados en términos de desempeño constituyen los propósitos de este libro.

Third International Handbook of Lifelong Learning Karen Evans, Wing On Lee, Jörg Markowitsch, Miriam Zukas, 2023-03-21 The Third edition of this well-received and widely used Handbook brings together an entirely new set of chapters, to reflect progress and new themes in the ten years to 2022. Building on the established structure of the first two Handbooks, the four sections focus in turn on: philosophy, history and theory development; fresh perspectives on policy and policy development; emerging programs and new approaches; and re-imagining lifelong learning for future challenges. The Handbook stimulates readers with fresh and timely insights, while exploring anew some enduring themes. New topics and themes introduced in all sections address lifelong learning challenges associated with climate change, the digital world, the rise of populism, migration and precarious living. The Handbook features learning innovations and evolving pedagogies such as intergenerational learning, art as pedagogy to promote public-mindedness, neuroscience enhancing learning effectiveness, and lifelong learning for sustainability. Policy responses to lifelong learning for work and well-being are debated. In state of the art contributions, authors from around the globe focus readers' attention on multifaceted processes, issues and decisions that must be better understood and enacted if inclusive development and fair access to lifelong learning are to become realities for us all.

Historia de la educación en la Argentina IX Adriana Puiggrós, 2021-05-01 Hoy como ayer resulta indispensable revisar la historia y la historiografía de la educación argentina, tanto para orientar las investigaciones que vuelven a tener lugar en las universidades públicas como para abonar las posturas frente a los cambios político-pedagógicos. El vol. IX de esta serie se propone analizar continuidades, rupturas y articulaciones entre la educación de fines del siglo XX y los fuertes cambios del siglo XXI, y también hacer historia en tiempos en los que las políticas adversas a la educación pública plantean diversas formas de desescolarización, la descalificación profesional y la sobreexplotación laboral de los docentes, la sustitución de la educación común por opciones tecnocráticas y meritocráticas, e intentan instalar lecturas que borren cualquier oscuridad del pasado.

El concurso directivo Claudio Ricardo Cisneros, 2020-12-01 Los desafíos que hoy tienen las distintas instituciones educativas es el de generar nuevas estrategias en los aprendizajes. Esto va a permitir mejorar no solo la enseñanza, sino también la gestión de los centros educativos. Este panorama provoca que docentes y directivos se conviertan en actores claves a la hora de desarrollar las políticas públicas educativas. Por ello, en esta obra se marca la necesidad de contar con material específico y general que acompañe estos procesos de cambios que se dan en la gestión de las escuelas. Como parte del rol de los profesionales en la educación, es necesario prepararse y capacitarse para la gestión institucional con el objetivo

de ofrecer acciones administrativas pedagógicas. De esta manera, estos profesionales podrán transitar como un garante de los derechos y brindar las mejores condiciones de la enseñanza. El concurso directivo: estrategias para resultados exitosos, es una ilustración de la gestión escolar. Está dirigida a docentes, directivos, supervisores, y a quienes se interesen en mejorar y garantizar la institucionalidad educativa.

A Comparative Analysis of Systems of Education Law Charles J. Russo, Leijun Ma, 2024-05-08 This book focuses on enhanced educator awareness of issues involving the status of the right to education as guaranteed by various legal systems throughout the world, in light of the growing interest in comparative and international studies, including the law. Consequently, this interdisciplinary, comparative book, which includes original chapters by leading academicians with expertise in law and education, is designed to serve as a resource for researchers in education and law as well as policymakers and students. To this end, the book provides readers with an enhanced awareness of the nature of legal systems impacting education throughout the world. Education is the driving force of the world development as well as the basic way to realize human rights and values. At the same time, law plays an important role in the protection, evaluation, guidance, and promotion in the process of the development of education. The book thus has interdisciplinary appeal. Various audiences will find this highly accessible book informative and valuable, including scholars with an interest in Education Law, university faculty and classes (whether involved in teacher preparation or educational leadership), legal practitioners, and university libraries.

Young Children's Developing Understanding of the Biological World Peter J. Marshall, Kimberly Brenneman, 2019-07-23

This book explores current research on young children's beliefs and knowledge about the biological world - otherwise known as 'folkbiology'. Contributors discuss factors that shape the development of folkbiological knowledge, as well as possible interventions designed to counteract cognitive biases that can interfere with the development of scientifically informed reasoning about natural phenomena. Taken together, the papers provide insights into the contributions of cognitive biases to the development of biological misunderstandings and into the life experiences and contexts that can contribute to or impede accurate learning of biological concepts. As part of a wider literature, the insights provided by the authors are relevant to the design of educational experiences that will foster children's exploration and further their understanding of life science ideas. The chapters in this book were originally published as a special issue of Early Education and Development.
