**Journey to the Center of the Earth-Voyage Au Centre de la Terre: English-French Parallel Text Edition** Jules Verne,2010-04-25 Jules Verne's classic Journey to the Center of the Earth is presented in English-French parallel text, complete and unabridged. A learned professor deciphers ancient runes that lead him to the earth's core and discoveries older than he dared imagined. With Édouard Riou art, reproduced from the first 1867 illustrated edition. The Bilingual Library presents the world's classics in parallel text. Each page in the original language is mirrored by its English translation on the facing page. Series editor D. Bannon is a member of the American Literary Translators Association and the American Translators Association.

*Ghent Planning Congress 1913* William Whyte,2013-08-22 The Ghent congress on town planning was the first genuinely international conference to address all aspects of civic life and design. Attended by representatives of 22 governments and 150 cities, as well as by hundreds of architects, planners, politicians, and scientists, it marked the culmination of a series of events which helped to form the world of town planning at the start of the twentieth century. Ghent illustrates three key themes for the history of town planning. First, the transactions of the congress include papers from some of the most significant theorists and practitioners of the period, such as Patrick Abercrombie, Augustin Rey, Raymond Unwin, and Joseph Stübben. Secondly, the congress as a whole reflects just how global the business of town planning had become by 1913: papers and exhibits included studies of colonial projects as well as European designs. The delegates themselves provide wonderful evidence of a transnational process at work. Finally, the text brilliantly illuminates the way in which town planning

was critically linked to other reformist movements of the era. The whole event, like the International Union of Cities that it spawned, was the product of the peace movement. Even as war draw nearer, the International Union was being spoken of as a future world government. Significantly, one of the organisers of the event – Henri La Fontaine - won the Nobel Peace Prize in 1913. The Premier Congrès international et exposition comparée des villes is a major publication, but it is one that is now almost impossible to obtain. This republication, a century after this seminal event, will be considerable interest not only to those who work on town-planning, but also transnational historians and writers on the peace movement more generally.
