Equity-Driven Leadership in School Counseling Caroline Lopez-Perry,E.C.M. Mason,2025-09-26 Drawing from the authors' experience as former school counselors, their research on school counselor leadership and advocacy, and their professional advocacy work, this book provides insights and strategies to develop school counselors' leadership skills. This book is divided into two parts. The first part focuses on self-reflection and critical consciousness for school counselors. It challenges their understanding of leadership and urges them to critically examine whether their personal definition of leadership aligns with the needs of diverse students and the broader educational context. Chapter topics include leadership and liberation, the limits of traditional leadership theories, leading with emotional intelligence, and the courage to confront systems of oppression. The second part calls the reader toward critical action and engagement in social and political activity and advocacy with the intent to disrupt and change perceived inequalities. Specific topics include developing political skills, addressing resistance to change, and developing collaborative relationships. School counselors will find this book filled with the necessary knowledge and skills to effect change in schools, districts, and the public arena for the benefit of P-12 students, particularly those from historically marginalized populations.

A Love-Stretched Life Jillana Goble, 2022-06-07 “With forthrightness and a sense of humor, the author crafts a poignant portrait of motherhood, replete with hard-earned wisdom. . . . This uplifting memoir exemplifies the power of faith, hope, and steadfast love.” —Publisher’s Weekly This life is real and complicated, messy, colorful, good, exhausting, and exhilarating—often simultaneously. It’s easy to feel overburdened by life’s demands. Looking out into the world as well as under the roof of our home may cause us to question, “How did we get here? And how will we get through?” Jillana Goble has

been there. With honesty, faith, and a dose of humor, her debut memoir, *A Love-Stretched Life*, chronicles what she's continually learning on the suspension bridge between reality and hope. A mom via foster care, birth, and adoption—in that order—for nearly two decades, Jillana has experienced life's curveballs. Her come-as-you-are posture amidst a daily reality far different than she ever imagined reassures you that you're not alone if your life isn't tidily wrapped in a bow. These stories will stay with you as you strive to love and to love well, even when—and especially when—it's hard. Whether you are widening your family circle or just trying to get through the day, Jillana welcomes you to her table, offering you an anchor of hope to hang on to as you navigate your own love-stretched life.

Calculating the Secrets of Life National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Committee on the Mathematical Sciences in Genome and Protein Structure Research, 1995-04-06 As researchers have pursued biology's secrets to the molecular level, mathematical and computer sciences have played an increasingly important role—in genome mapping, population genetics, and even the controversial search for Eve, hypothetical mother of the human race. In this first-ever survey of the partnership between the two fields, leading experts look at how mathematical research and methods have made possible important discoveries in biology. The volume explores how differential geometry, topology, and differential mechanics have allowed researchers to wind and unwind DNA's double helix to understand the phenomenon of supercoiling. It explains how mathematical tools are revealing the workings of enzymes and proteins. And it describes how mathematicians are detecting echoes from the origin of life by applying stochastic and statistical theory to the study of DNA sequences. This informative and motivational book will be of interest to researchers, research administrators, and educators and students in mathematics, computer sciences, and biology.

Essentials of Organizational Behavior Terri A. Computer-Assisted Literary Translation Andrew Rothwell, Andy Way, Roy Youdale, 2023-11-30 This collection surveys the state of the art of computer-assisted literary translation (CALT), making the case for its potential to enhance literary

translation research and practice. The volume brings together early career and established scholars from around the world in countering prevailing notions around the challenges of effectively implementing contemporary CALT applications in literary translation practice which has traditionally followed the model of a single translator focused on a single work. The book begins by addressing key questions on the definition of literary translation, examining its sociological dimensions and individual translator perspective. Chapters explore the affordances of technological advancements and availability of new tools in such areas as post-edited machine translation (PEMT) in expanding the boundaries of what we think of when we think of literary translation, looking to examples from developments in co-translation, collaborative translation, crowd-sourced translation and fan translation. As the first book of its kind dedicated to the contribution CALT in its various forms can add to existing and future scholarship, this volume will be of interest to students and scholars in Translation Studies, especially those working in literary translation, machine translation and translation technologies.

Protesting Gender Anna Lavizzari, 2019-12-06 Drawing on fieldwork conducted in Italy among political activists of the LGBTIQ movement and the traditionalist movement during the “anti-gender” campaign, this book provides a dynamic picture of their sustained interactions. Through an analysis of the contentious strategies, discourses, and performances of both the LGBTIQ and the traditionalist movements from a strategic interactionist perspective, it considers the key actors involved in this struggle over normative and social change, showing how activists on both sides are confronted with different dilemmas, influencing each other’s choices, practices and identities at the individual and collective levels. Approaching social movements as interactive processes, the author deploys the concepts of social performance and gender performativity to illustrate the ways in which activists interact with and within gender norms, and how they reproduce or contest gender hierarchies as they protest, thus revealing the centrality of gender to the analysis of processes of recruitment and mobilization, strategies, frames and forms of organization. As such, it will appeal to scholars of sociology and political science with interests in social movements and gender.

Rosa's Piano Book - Fake Book No. 2 - 10 Popular Songs Rosa Suen, 2014-09-06 Rosa's Fake Book 2 Songs is a unique Fake Book for all piano players. In a normal 'Fake Book', you get only the music score with the RH melody and the chords above it. This Special Fake Book No. 2 has an additional element that adds interest and fun to a piano player. Chord Movement Diagrams of the same song in its basic chords for beginners and rich sounding chords for the advanced piano players. Rosa's Fake Book No. 2 has 10 Standards & Popular Songs: 1. Love Me Tender 2. Some Enchanted Evening 3. Yesterday - Beatles 4. Misty 5. The Way We Were 6. For All We Know 7. Over The Rainbow 8. The Way You Look Tonight 9. Love Story: Where Do I Begin? 10. All I Ask Of You There are 3 sections for each Song so that students can do 3 things: 1. Basic Chord Charts With Lyrics: I give you a chord chart with the song lyrics. In order to abide to the copyright issues, I slightly changed some of the words. The lyrics with chord chart is to show you where to put the basic chords (I, IV, V7) into the song so that you can start playing the song using only basic chords. Sometimes the song has accidental tones, so I need to harmonize it with other chords and I give you the explanation at the bottom of the chart. What you need to learn is that visually, you can see distinctive patterns in the song just by looking at the basic chord chart. You can also see repetitive chord progressions in the song. This will help you play the song in the flow because you learn to think in chord progression and not chord by chord. Just like when you talk, you don't think in words (word by word), but your thoughts come out in sentence form. This is what chord progression is about. When you look at these basic chord charts, you can try to play the song by ear just looking at these chords. If you cannot, then you can go to the Music Score Cheat Sheet. 2. Music Score Cheat Sheet: This is not a complete lead sheet because I want you to learn to play the song by ear. I purposely put only the first note of each bar in the song to guide you along. Once you hear the first note of the bar, you will be surprised how easily it is to pick out the melody tones in between. This is called Music Score Cheat Sheet. For some piano players, they need the complete lead sheet to play the song. There is a site called Wikifonia that provides free distribution of lead sheets. For your convenience, I provide a link for you in each section so that you can click on the link to download the full score lead sheet in pdf format for

your resources. 3. Reharmonization: Places to put in Chord Substitutions: Reharmonization is a music technique that uses an existing melodic line of a song and alters the harmonic progression to give the song a new color. It is like putting a new paint job on an old car. The most basic form of reharmonization is using chord substitution and chord extensions. The new chord changes provide new musical interest and variety. They can sometimes alter the mood of the original melody. There are 10 Level of Chord Substitutions that I use: I reharmonize the songs with the following advanced chords: C, C6, CM7, C6/9, F6, FM7, F6/9, FM9, G7, G9 E Am7, Dm7, Em7 E C7, A7, D7, E C7b9, D7b9, G7b9, A7b9 E C#dim7, D#dim7, Ebdim7, F#dim7 E C+, G+, A+, D+ E G7sus, C7sus, A7sus, D7sus E Db7, Eb7, Gb7, Ab7, Bb7 E Cm7b5, Fm7b5, Bm7b5, Am7b5, Dm7b5, Gm7b5
