Keith L. Moore, Arthur F. Dalley

Anatomía de Last Chummy S. Sinnatamby, 2003-11 Al preparar la decima edicion inglesa de la Anatomia de Last, Chummy S. Sinnatamby ha mantenido la estructura y distribucion general del libro. Sin embargo, ha sometido la totalidad del texto a una revision completa encaminada a reducir su volumen y lograr mayor claridad.

Anatomía Humana Michel Latarjet, Alfredo Ruiz Liard, 2004 Un clásico renovado con el sello distintivo que aúna la tradición con la más actualizada literatura médica. Sigue los cambios en los diseños curriculares de los estudios médicos en las Universidades de América Latina y España, que tiende a un conocimiento anatómico que vincula la información anatómica a la aplicación clínica y privilegia la información que proporcionan las nuevas técnicas de diagnóstico por imágenes.

Feneis. Nomenclatura Anatómica Ilustrada Wolfgang Dauber, 2021-02-15 Nueva edición del considerado un verdadero clásico en anatomía. Durante más de 50 años, Feneis (ahora Dauber) se ha consolidado como un estándar de referencia: todos los términos anatómicos (>8.000) se explican mediante textos e ilustraciones (>8.000) de forma breve, concisa y precisa. La obra se basa en la completa y nueva Terminología Anatómica oficial definida por el FIPAT (Federative International Programme for Anatomical Terminology) e incluye los tres índices (latín, inglés y español). Precisamente la utilización de esta nomenclatura es lo que hace que la obra sea reconocida y validada por toda la comunidad científica internacional, así como que esta obra se haya traducido a 15 idiomas. Se mantiene el diseño a doble página, así como el índice de contenidos. Se han añadido nuevos términos anatómicos pertenecientes al SNC y se han reescrito algunos textos que acompañan a las ilustraciones que podían resultar confusos.

Disease of the Pancreas Eugene Lindsay Opie, 1903

Experimenta nova circa pancreas. Accedit diatribe de lymphæ&genuino pancreatis usu. [With plates.] Johann Conrad Brunner, 1683

History of the Pancreas: Mysteries of a Hidden Organ John M. Howard, Walter Hess, 2002-11-30 Never before has such a history of the pancreas been presented. From antiquity until today, rediscovery, translation and sequential presentation, in step with cultural changes in society, make this a unique contribution. Only from the perspective of the two octogenarian authors could such a narrative have been produced. Discoveries resulting either from chance observation or careful scientific inquiry come alive as the authors present not only the people who made them but the setting in which they occurred. Key Features: *From the pre-Christian era of Asia Minor, to Greece, Rome, Europe and America, to the explosive progress in Japan, the dreams, near-misses and great discoveries have been traced to their sources. *The great discoveries of the anatomists, Wirsüng, Santorini, Oddi, Vater and their colleagues have been recreated from their original reports. *Physiology

is traced through the discovery of the digestive enzymes; the islets, by the Berlin student for whom they were named; the hormones, beginning with the dramatic discoveries of insulin, gastrin and their fascinating tumors. *Diseases of the pancreas, particularly pancreatitis and cancer, but also congenital anomalies and trauma, are described from the era preceding the microscope to the dawn of the 21st Century. *The explosive developments of imaging, diagnosis and pancreatic transplantation are presented, leading to the development of the challenging field of Pancreatology - its science and clinical practice. *Finally the authors, having spent many years distilling the contribution of the giants of the past and present, present a thought provoking Chapter entitled Lessons from History and their Application to the Future.

The Pancreas Milo Keynes, Roger G. Keith, 1981

PANCREAS A. W. MAYO. ROBSON, 2018

The Exocrine Pancreas Stephen Pandol, 2011 The secretions of the exocrine pancreas provide for digestion of a meal into components that are then available for processing and absorption by the intestinal epithelium. Without the exocrine pancreas, malabsorption and malnutrition result. This chapter describes the cellular participants responsible for the secretion of digestive enzymes and fluid that in combination provide a pancreatic secretion that accomplishes the digestive functions of the gland. Key cellular participants, the acinar cell and the duct cell, are responsible for digestive enzyme and fluid secretion, respectively, of the exocrine pancreas. This chapter describes the neurohumoral pathways that mediate the pancreatic response to a meal as well as details of the cellular mechanisms that are necessary for the organ responses, including protein synthesis and transport and ion transports, and the regulation of these responses by intracellular signaling systems. Examples of pancreatic diseases resulting from dysfunction in cellular mechanisms provide emphasis of the importance of the normal physiologic mechanisms.

The Pancreas, Its Surgery and Pathology Sir Arthur William Mayo Robson, Percy John Cammidge, 1907 Pankreas.

Frozen Section Library: Pancreas Wendy L. Frankel, Daniela M. Proca, 2011-02-04 Frozen sections of the pancreas are performed to assess resectability, for tissue confirmation and to assess margins. The clinical implications of an accurate frozen section diagnosis are dramatic as far as type and extent of surgery performed. Frozen Section of the Pancreas will provide a concise pictorial compendium to facilitate intraoperative consultations on pancreas specimens. The book will be 5x8 and is estimated to be 200-250 pages with 100-150 color figures. This user-friendly handbook will be divided into chapters that emphasize the common questions a pathologist must answer on frozen section examination and will provide guidance for the differential diagnosis of various histologic patterns. The purpose of this book is to aid in the timely frozen section diagnosis of pancreatic lesions by using a broad array of illustrations, which would reinforce one's visual memory, and a condensed text, useful for rapid review of main diagnostic features. Currently, there is no other up-to-date, single-

source reference specifically focused on frozen sections of the pancreas.
