Perspectives on Substance Use, Disorders, and Addiction Margaret Fetting, 2015-09-23 *Perspectives on Substance Use, Disorders and Addiction*, Second Edition, is a philosophical and clinical text that suggests new ways to think about the relationships, enjoyment, and troubles with substances of pleasure. The book is designed for students and clinicians who come in contact with and treat individuals and families struggling with the causes and consequences of substance use disorders and addiction. The second edition of *Perspectives* presents a refreshing blend of ancient and contemporary ideas on the natural pleasures and potential powers of alcohol and drugs in our everyday individual and collective lives.

Processed Food Addiction Joan Ifland PhD, Marianne T. Marcus, Harry G. Preuss, 2017-12-22 Obesity and eating disorders have stubbornly refused to respond to treatment since the 1990's. This book organizes the evidence for a possible answer, i.e., that the problem could be one of addiction to processed foods. In a Processed Food Addiction (PFA) model, concepts of abstinence, cue-avoidance, acceptance of lapses, and consequences all play a role in long-term recovery. Application of these concepts could provide new tools to health professionals and significantly improve outcomes. This book describes PFA recovery concepts in detail. The material bridges the research into practical steps that health professionals can employ in their practices. It contains an evidence-based chapter on concepts of abstinence from processed foods. It rigorously describes PFA pathology according to the DSM 5 Addiction Diagnostic Criteria. It applies the Addiction Severity Index to PFA so that health practitioners can orient themselves to diagnosing and assessing PFA. It contains ground-breaking insight into how to approach PFA in children. Because the book is evidence-based, practitioners can gain the confidence to put the controversy about food addiction to rest. Practitioners can begin to identify and effectively help their clients who are addicted to processed foods. This is a breakthrough volume in a field that could benefit from new approaches.
