**Many Splendored Things** Susanna Paasonen, 2018-11-27 Exploring sex—bodily capacities, appetites, orientations, and connections—in terms of play and playfulness. We all know that sex involves a quest for pleasure, that sexual palates vary across people's lifespans, and that playful experimentations play a key role in how people discover their diverse sexual turn-ons and turn-offs. Yet little attention has been paid to thinking through the interconnections of sex and play, sexuality and playfulness. In *Many Splendored Things* from Goldsmiths Press, Susanna Paasonen considers these interconnections. Paasonen examines the notions of playfulness and play as they shed light on the urgency of sexual pleasures, the engrossing appeal of sex, and the elasticity of sexual desires, and considers their connection to categories of identity. Drawing on a broad range of scholarship on sexuality, play, and the media, Paasonen moves from the conceptual to the concrete, examining advice literature on sexual play, the vernacular aesthetics of the *Fifty Shades* series, girls' experiences of online sexual role-playing, popular media coverage of age-play, and Jan Soldat's documentary films on BDSM culture. Paasonen argues that play in the realm of sexuality involves experimentation with what bodies can feel and do and what people may imagine themselves as doing, liking, and preferring. Play involves the exploration of different bodily capacities, appetites, orientations, and connections. Occasionally strained, dark, and even hurtful in the forms that it takes and the sensory intensities that it engenders, sex presses against previously perceived and imagined horizons of embodied potentiality. Play pushes sexual identifications into motion.

**Signifying Acts** R. S. Perinbanayagam,1985 The theme of Signifying Acts is that social acts are created by human agents engaging in signifying gestures and eliciting determined responses--from which flow a number of consequences. This theme is developed by a critical synthesis of various strands of early and contemporary thought in symbolism, meaning, language, and grammar. These strands have been classified as pragmatism and interactionism, structuralism and grammatical theory Perinbanayagam brings together for the first time the writings of G. H. Mead and his followers, who label their efforts symbolic interactionism, and the recent developments in the philosophical and anthropological studies of mind and meaning. Through his wide-ranging analysis, he demonstrates the sociological relevance of Chomsky, Derrida, and Searle and particularizes their contributions to a more comprehensive theoretical framework. The interdisciplinary scope of his thesis recalls Ernest Becker's Birth and Death of Meaning, and his stylistic flair will stimulate readers at all levels of sophistication.

**Media Today** Joseph Turow,2016-10-04 Media Today uses convergence as a lens that puts students at the center of the profound changes in the 21st century media world. Through the convergence lens they learn to think critically about the role of media today and what these changes mean for their lives presently and in the future. The book's media systems approach helps students to look carefully at how media content is created, distributed, and exhibited in the new world that the digital revolution has created. From newspapers to video games and social networking to mobile platforms, Media Today prepares students to live in the digital world of media.
