Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education Haas, Leslie,Tussey, Jill,2021-01-15 The idea of storytelling goes beyond the borders of language, culture, or traditional education, and has historically been a tie that bonds families, communities, and nations. Digital storytelling offers opportunities for authentic academic and non-academic literacy learning across a multitude of genres. It is easily accessible to most members of society and has the potential to transform the boundaries of traditional education. As concepts around traditional literacy education evolve and become more culturally and linguistically relevant and responsive, the connections between digital storytelling and disciplinary literacy warrant considered exploration. Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education develops a conceptual framework around pedagogical connections to digital storytelling within K-12 disciplinary literacy practices. This essential reference book supports student success through the integration of digital storytelling across content areas and grade levels. Covering topics that include immersive storytelling, multiliteracies, social justice, and pedagogical storytelling, it is intended for stakeholders interested in innovative K-12 disciplinary literacy skill development, research, and practices including but not limited to curriculum directors, education faculty, educational researchers, instructional facilitators, literacy professionals, teachers, pre-service teachers, professional development coordinators, teacher preparation programs, and students.

Pencils Down! Paula Greene,2012-09 Pencils Down! has been forty-five years in the making. It is hoped that by sharing classroom experiences, the reader will be entertained, enlightened, and educated. The ideas presented are written for all educators: veteran, novice, substitute and student teachers, parents who homeschool, college and university professors, as well as for anyone who has a child in his or her care. The guide offers the fruit of my experiences, gleaned from a lifetime in the classroom. Writing this book has been a labor of love, and it is my sincere hope that all educators reading this book will find some fresh insight into the wonderful profession of teaching. Pencils Down! will take you on a journey whose itinerary begins in elementary school and spans more than four decades. I have taken that journey at the head of the class.Many an author has written a book on education without ever having stepped into a real classroom. I have stepped into many classrooms, many times, over many years, and now feel qualified to write my first book.Having successfully survived as a teacher forty-five years in the public and private sectors of both the New York and Nevada school systems prompted me to write this book, a book packed with lessons that work, school humor, enrichment activities, and sage advice ready to be used

by anyone who desires to instill a love of learning in a child. You may wish to do many of the lessons with your students. Most of the text deals with activities based on beloved children's books. I have selected more than fifty children's books I most enjoyed reading and teaching my students. Although some of these books never achieved Newbery Medal award status, each book teaches something of life's lessons, and each is a gem. My first priority was selecting excellent children's books. I have selected a broad and diverse collection of children's books with the hope that by using these books daily with all elementary school children, each child can learn to love books and appreciate the extended benefits of lifelong literacy. To give you a true flavor of what is covered, a summary of each part follows. Welcome to Pencils Down!

Part One: School Humor You are reading this either because you are contemplating a career in teaching or are curious to find out whether a veteran teacher can still be sane after spending forty-five years in the classroom. Part One presents the humorous side to an otherwise serious profession. You will get a glimpse of nineteenth and early twentieth century rules for teachers and peruse a copy of the contract teachers were made to sign. Both will make you wonder why anyone would consider a career in education. You will find out what teachers make and be privy to the public's low opinion of teachers' salaries. If you survive the reality show for educators, you may continue reading the book. School anecdotal incidents, accrued from many years in the classroom, will be shared. You will learn why God created the teacher and will be introduced to the new school policy. A test designed for preschoolers will challenge you. Answers from kindergartners and first graders as to why we read and write will be sure to surprise and amuse you. Actual student test answers and parental notes are included, both good for a chuckle. The difference between an educator and a teacher will be clarified. Today's schools, vs. schools in the 50's and 60's, will make you wish you were teaching in a simpler era and make you wonder if schools are still teaching math. An Australian school's answering machine will make you smile, as will the eleven things you did not and will not learn in school.

Part Two: Getting to Know You Getting to know you, Getting to know all about you.

The Class from the Black Lagoon Mike Thaler, 2014-02-25 It's another scary day at the Black Lagoon . . . for the new teacher, Mrs. Green. There's a new class coming for the first day of school and Mrs. Green is worried. Is it true that the class is really weird and that they put their last three teachers into early retirement? Will the students really turn into horrible ghouls as soon as they get to school? Will Mrs. Green really need her ultimate survival kit to teach the class or tame the class?

The Watercooler Effect Nicholas DiFonzo Ph.D.,2008-09-11 A fresh look at informal communication, and how information spreads rapidly...An absorbing and compelling book. -Daniel J. Levitin, author of *This Is Your Brain on Music* and *The World in Six Songs* Nicholas DiFonzo is one of the world's experts on why rumors spread. If you've ever wondered where rumors come from or whether some new rumor is true, this book will fascinate you. - Chip Heath, coauthor of *Made to Stick: Why Some Ideas Survive and Others Die* During the 2008 presidential election, both campaigns sought to detect, decipher, and defuse a host of derogatory rumors. After Hurricane Katrina, rumors swirled about stranded residents shooting rescue

workers. Tipping off the economic crisis, costly rumors crippled financial institutions as they flew through the stock market. Psychologist Nicholas DiFonzo has studied hearsay for more than fifteen years, and in this book he shows how the process that gave rise to these troubling rumors is fundamentally the same as a tête-à-tête around the company watercooler. With *The Watercooler Effect*, you'll learn: *how businesses or campaigns can control destructive rumors *how to sort fact from fiction *why a no comment response can be more detrimental than helpful *how an organization can increase trust from within *why rumors can actually become more truthful the more they spread DiFonzo argues that rumors stem from our deeply rooted motivation to make sense of the world and are a window into both individual and group psychology. Using fascinating case studies and surprising research findings, *The Watercooler Effect* gives you the tools to find the truth behind the rumor.

The Watercooler Effect Nicholas DiFonzo, 2008 Psychologist DiFonzo has studied hearsay for more than 15 years, and in this book he argues that rumors--and the tendency to believe them without question--stem from people's deeply rooted motivation to make sense of the world.
