Contemporary international relations. Great power politics. Theory and practice: Lectures Олег Арин / Алекс Бэттлер, 2023-08-19 The current book, "Contemporary International Relations. Great Power Politics. Theory and Practice," is a series of lectures based on the author's large-scale scholarly research called Mirology. Through years of work, Battler has developed a comprehensive categorial and conceptual framework for understanding World and International Relations (WIR). This lecture course offers a unique approach that sets it apart from similar works. The author draws conclusions and inferences from the linking theory and practice, resulting in a fresh perspective on evaluating the foreign and domestic policies of the United States, China, Japan, and Russia. The lectures are primarily intended for experts and tutors in politics, security, economics, foreign affairs, and journalism. They are also for those curious and wanting to expand their knowledge about the world.

World War II Resources on the Internet Roland H. Worth, 2002 This book is a guide to the enormous number of World War II resources available on the Internet. Section One contains addresses of websites with information pertaining to pre-war international diplomacy and crises in Europe and Asia, and United States and Allied wartime diplomacy in Europe and Asia. Section Two lists websites containing information about the world at war, particularly those providing overviews of the war or specifically covering the fighting in Europe, the Mediterranean, the Pacific Islands, or mainland Asia. Sites listed in Section Three contain information about selected major civilian and military leaders of the war years, including Charles de Gaulle, Adolf Hitler, Chiang Kai-Shek, General Douglas MacArthur, Benito Mussolini, General George S. Patton, Jr., Franklin D. Roosevelt, Joseph Stalin, Tojo Hideki, and Harry S Truman, to name a few. For each site listed, a brief description and summary of its information is provided.

Stalin's Wars Geoffrey Roberts, 2006-01-01 This breakthrough book provides a detailed reconstruction of Stalin's leadership from the outbreak of the Second World War in 1939 to his death in 1953. Making use of a wealth of new material from Russian archives, Geoffrey Roberts challenges a long list of standard perceptions of Stalin: his qualities as a leader; his relationships with his own generals and with other great world leaders; his foreign policy; and his role in instigating the Cold War. While frankly exploring the full extent of Stalin's brutalities and their impact on the Soviet people, Roberts also

uncovers evidence leading to the stunning conclusion that Stalin was both the greatest military leader of the twentieth century and a remarkable politician who sought to avoid the Cold War and establish a long-term detente with the capitalist world. By means of an integrated military, political, and diplomatic narrative, the author draws a sustained and compelling personal portrait of the Soviet leader. The resulting picture is fascinating and contradictory, and it will inevitably change the way we understand Stalin and his place in history. Roberts depicts a despot who helped save the world for democracy, a personal charmer who disciplined mercilessly, a utopian ideologue who could be a practical realist, and a warlord who undertook the role of architect of post-war peace.

Mental Maps in the Era of Two World Wars Steven Casey,Jonathan Wright,2008-07-11 This book explores the 'mental maps' of twelve leaders during the era of two world wars. It has chapters on the giants of these years, men like Lloyd George, Lenin, Streseman, Mussolini, Hitler, Roosevelt and Churchill, whose ideas cast a compelling shadow. It also has essays on important figures who are not always at the forefront of the literature on this period, men such as Atatuerk, Benes, Chiang, Poincaré and Mao.

Reflections on Stalinism J. Arch Getty,Lewis H. Siegelbaum,2024-06-15 Reflections on Stalinism distills decades of historical thought and research, bringing together twelve senior scholars of Soviet history who began their careers during the Cold War to examine their views of Stalinism. They present insights into the role of personality in statecraft, the social underpinnings of dictatorship and state terrorism, historians' attachments to their subjects, historical causality, the

applicability of Marxist categories to Soviet history, the relationship of Soviet history to post-Soviet Russia, and more. Essays address the transformation of a peasant country into a superpower and the causes and scale of domestic bloodshed. Reflections on Stalinism ultimately tackles an age-old question: Do powerful people make history or are they the product of it?
