*Quail, Buttonquail and Plains-wanderer in Australia and New Zealand* Joseph M. Forshaw,2023-05 Although not closely related, quail, buttonquail and the Plains-wanderer have much in common. Quail, Buttonquail and Plains-wanderer in Australia and New Zealand examines 14 species of these small, secretive ground-dwelling birds, including Old World and New World quail, the endangered Buff-breasted Buttonquail, the elusive Plains-wanderer and the extinct New Zealand Quail. Joseph Forshaw presents a comprehensive review of recent studies for these often hard to observe birds. Detailed species descriptions include key features, habitat, status, diet and breeding, along with information on eggs, calls and distribution. Each species is fully illustrated with exquisite colour identification plates by renowned wildlife artist Frank Knight. This is an essential reference for anyone fascinated by these elusive birds.

Guidebook on Environmental Impact Assessment for in Situ Leach Mining Projects International Atomic Energy

Agency, 2005 Assessment of the potential environmental impact of an in situ leach (ISL) project is the first step in the permission and licensing process. An Environmental Impact Assessment (EIA) serves as the basis for preparing an Environmental Impact Statement (EIS), which in turn identifies the potential environmental and socioeconomic impact of a proposed project and outlines measures to mitigate this impact. The EIS review process serves to inform the public about a proposed project as well as to provide regulatory agencies with assurance that ISL technology will comply with environmental standards, and that project sites can be rehabilitated to pre-mining use. This publication provides a step-by-step description of project parameters that must be addressed in conducting an EIA and preparing an EIS. It also includes EIA/EIS case histories for current operations in Australia, the Czech Republic, Kazakhstan and the United States of America. The publication will be useful to companies considering the development of ISL projects and to regulatory personnel who are responsible for writing environmental regulations and licensing ISL projects.
