Southern Bound John S. Sledge, 2013-03-15 Southern Bound represents a running conversation on books, writers, and literary travel written for the Mobile Press-Register Books page from 1995 to 2011 by John S. Sledge. The collection includes more than one hundred of the best pieces culled from Sledge's total output of approximately seven hundred columns. Numerous classic authors are celebrated in these pages, including Homer, Plato, Gibbon, Melville, Proust, Conrad, Cather, and Steinbeck as well as modern writers such as Walter Edgar, Tom Franklin, and Eugene Walter. While some of the essays are relatively straightforward book reviews, others present meditative and deeply personal perspectives on the author's literary experiences such as serving on the jury in the play version *To Kill a Mockingbird*; spending the night alone in a Jesuit college library's venerable stacks; rambling through funky New Orleans bookshops; talking to Square Books owner Richard Howorth while overlooking the Oxford, Mississippi courthouse; rereading *Treasure Island* on the shores of Mobile Bay; and remembering a beloved father's favorite books. Engaging and spirited, Southern Bound represents the critical art at its most accessible and will prove entertaining fare for anyone who loves the written word.

Fruit of the Tree Joseph Grossman, 2018-11-07 Joe never thought of himself as anyone special. He's a regular working-class piece of work picking up a few bucks by day and spending them all by the next morning, trying to stay one step ahead of the repo man and keep his head above water. Then, one day, while working for a multibillion-dollar multinational corporation in Iraq, he finds himself chosen to continue a mission that has remained secret for thousands of years. In an unlikely turn of events, Joe is removed from his mundane existence and sent to find a legendary object that has defined and directed humanity since the dawn of time. Each encounter comes with a choice: Which way is genius, and which is madness?

Why was he chosen? And who can he trust? Joe seeks knowledge, but too much knowledge is a dangerous thing. Only time will reveal the consequences for the world if he is successful. In this novel, an innocent man is thrust into a race against time; a quest to find a mysterious object that has the power to change the world.

The Alignment Problem Brian Christian, 2020-10-06 If you're going to read one book on artificial intelligence, this is the one. —Stephen Marche, New York Times A jaw-dropping exploration of everything that goes wrong when we build AI systems and the movement to fix them. Today's "machine-learning" systems, trained by data, are so effective that we've invited them to see and hear for us—and to make decisions on our behalf. But alarm bells are ringing. Recent years have seen an eruption of concern as the field of machine learning advances. When the systems we attempt to teach will not, in the end, do what we want or what we expect, ethical and potentially existential risks emerge. Researchers call this the alignment problem. Systems cull résumés until, years later, we discover that they have inherent gender biases. Algorithms decide bail and parole—and appear to assess Black and White defendants differently. We can no longer assume that our mortgage application, or even our medical tests, will be seen by human eyes. And as autonomous vehicles share our streets, we are increasingly putting our lives in their hands. The mathematical and computational models driving these changes range in complexity from something that can fit on a spreadsheet to a complex system that might credibly be called "artificial intelligence." They are steadily replacing both human judgment and explicitly programmed software. In best-selling author Brian Christian's riveting account, we meet the alignment problem's "first-responders," and learn their ambitious plan to solve it before our hands are completely off the wheel. In a masterful blend of history and on-the ground reporting, Christian traces the explosive growth in the field of machine learning and surveys its current, sprawling frontier. Readers encounter a discipline finding its legs amid exhilarating and sometimes terrifying progress. Whether they—and we—succeed or fail in solving the alignment problem will be a defining human story. The Alignment Problem offers an unflinching reckoning with humanity's biases and blind spots, our own unstated assumptions and often contradictory goals. A dazzlingly interdisciplinary work, it takes a hard look not only at our technology but at our culture—and finds a story by turns harrowing and hopeful.

To Fischer chess is a highly competitive sport which requires not only meticulous opening preparation, a high state of tactical alertness and perfect technique, but also a constant striving for the initiative, immense will to win and even calculated risktaking. Bobby Fischer's Games of Chess Bobby Fischer,2008 This is the only book ever written entirely by Bobby Fischer. It is not to be confused with other books with similar names that were written by other authors. Here is the blurb on the original dust jacket, as published in 1959: THERE ARE 34 games in this book. The 13 from the U.S. Championship Tournament of 1957-58 and the prize-winning Game of the Century from the Third Rosenwald Trophy Tournament are penetratingly analyzed by Bobby Fischer, whose annotations provide invaluable instructions to the chess player of either average or advanced ability. In addition, this book includes the scores of Bobby Fischer's 20 games from the 1958 Portoroz Interzonal Tournament in which he played against the world's elite in chess, among them Tal, Gligorich, Petrosyan, and Bronstein. The games in this book reveal Bobby Fischer's brilliance in middle and end-game strategy, and also the latest and soundest treatments of popular openings-in particular, the Sicilian and King's Indian defenses. By playing these games over, the reader will become familiar with the patterns of the latest and soundest lines in chess, and will automatically begin to make stronger moves in his own games. At the age of fifteen, Bobby Fischer was the youngest international grandmaster of all time. He lives in Brooklyn, was a junior at Erasmus Hall High School, and looking forward to the 1959 Candidates' Tournament, the winner of which challenges Mikhail Botvinnik for the world championship.
