Death in Yellowstone Lee H. Whittlesey, 1995 Intriguing stories of how people have died in Yellowstone warn about the many dangers that exist there and in wild areas in general.

Summary of Lee H. Whittlesey's Death in Yellowstone Everest Media, 2022-07-16T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 In July 1981, David Allen Kirwan, 24, of La Canada, California, and his friend Ronald Ratliff, 25, of Thousand Oaks, parked their truck at Yellowstone's Fountain Paint Pot parking lot. While they looked at the hot springs, Ratliff's dog Moosie escaped and jumped into nearby Celestine Pool. Kirwan went into the pool to save the dog. #2 The idea of being boiled to death in a hot spring is a truly terrifying one for any rational person. However, this has happened more frequently in Yellowstone National Park than it has with grizzly bears. #3 The number of tourists in Yellowstone Park increased as it became more accessible, and so did the chances of visitor injury. In 1882, a traveler named Walter Watson fell into a long and deep geyser tube, while accompanied by three other men, who gave him up for dead and left. #4 In the 1880s, hot-spring injuries began to occur in greater numbers as visitors to Yellowstone increased. A Mr. Crossman was scalded in the Fountain Paintpot in 1884, a young boy in the same summer who convalesced at Marshall's Hotel, and another man in the Artists' Paintpots in 1888.

Myths about Suicide Thomas Joiner, 2011-11-30 Around the world, more than a million people die by suicide each year. Yet many of us know very little about a tragedy that may strike our own loved ones—and much of what we think we know is wrong. This clear and powerful book dismantles myth after myth to bring compassionate and accurate understanding of a massive international killer. Drawing on a fascinating array of clinical cases, media reports, literary works, and scientific studies, Thomas Joiner demolishes both moralistic and psychotherapeutic clichés. He shows that suicide is not easy, cowardly, vengeful, or selfish. It is not a manifestation of suppressed rage or a side effect of medication. Threats of suicide, far from being idle, are often followed by serious attempts. People who are prevented once from killing themselves will not necessarily try again. The risk for suicide, Joiner argues, is partly genetic and is influenced by often agonizing mental disorders. Vulnerability to suicide may be anticipated and treated. Most important, suicide can be prevented. An eminent

expert whose own father's death by suicide changed his life, Joiner is relentless in his pursuit of the truth about suicide and deeply sympathetic to such tragic waste of life and the pain it causes those left behind.

What If? 2 Randall Munroe, 2022-09-13 AN INSTANT NEW YORK TIMES BESTSELLER! An NPR Best Book of 2022 The questions throughout What If? 2 are equal parts brilliant, gross, and wonderfully absurd and the answers are thorough, deeply researched, and great fun. . . . Science isn't easy, but in Munroe's capable hands, it surely can be fun. —TIME The #1 New York Times bestselling author of What If? and How To answers more of the weirdest questions you never thought to ask The millions of people around the world who read and loved What If? still have questions, and those questions are getting stranger. Thank goodness xkcd creator Randall Munroe is here to help. Planning to ride a fire pole from the Moon back to Earth? The hardest part is sticking the landing. Hoping to cool the atmosphere by opening everyone's freezer door at the same time? Maybe it's time for a brief introduction to thermodynamics. Want to know what would happen if you rode a helicopter blade, built a billion-story building, made a lava lamp out of lava, or jumped on a geyser as it erupted? Okay, if you insist. Before you go on a cosmic road trip, feed the residents of New York City to a T. rex, or fill every church with bananas, be sure to consult this practical guide for impractical ideas. Unfazed by absurdity, Munroe consults the latest research on everything from swing-set physics to airliner catapult-design to answer his readers' questions, clearly and concisely, with illuminating and occasionally terrifying illustrations. As he consistently demonstrates, you can learn a lot from examining how the world might work in very specific extreme circumstances.

Travels With Casey Benoit Denizet-Lewis, 2015-07-21 Over four months, 32 states, and 13,000 miles in a rented motor home, Denizet-Lewis and his canine companion attempt to pay tribute to the most powerful interspecies bond there is, in the country with the highest rate of dog ownership in the world. On the way, Denizet-Lewis--known for his deeply reported dispatches from far corners of American life--meets an irresistible cast of dogs and dog-obsessed humans.

Squatters in Paradise James Perry, 2009-01-29 *Squatters in Paradise* is the long-awaited cri-de-coeur of Yellowstone employees - savages - and gleefully exposes the dark and ticklish underbelly of seasonal work in America's first national park. Written with unapologetic irreverence, the author also manages to convey the very real affection that park employees feel for their natural environs and the community which forms each season within the borders of this unique and magical place. A must-read for those who have worked in Yellowstone National Park (or anyone who has harbored the idea of taking a break from the real world for a while).

Over the Edge Michael Patrick Ghiglieri, Thomas M. Myers, 2001 Gripping accounts of all know fatal mishaps in the most famous of the World's Seven Natural wonders.

Storytelling in Yellowstone Lee H. Whittlesey, 2007 Whittlesey shares tales of the great Geyserland as told by the earliest tour guides of America's first and most unique national park.
