**Joseph Y. Halpern**

**Logic, Rationality, and Interaction** Alexandru Baltag, Jeremy Seligman, Tomoyuki Yamada, 2017-09-01 This LNCS volume is part of FoLLI book series and contains the papers presented at the 6th International Workshop on Logic, Rationality and Interaction/ (LORI-VI), held in September 2017 in Sapporo, Japan. The focus of the workshop is on following topics: Agency, Argumentation and Agreement, Belief Revision and Belief Merging, Belief Representation, Cooperation, Decision making and Planning, Natural Language, Philosophy and Philosophical Logic, and Strategic Reasoning.

*Recent Developments in Criminological Theory* Scott A. Lukas, 2017-07-05 This volume contains recent and cutting-edge articles from leading criminological theorists. The book is organized into ten sections, each representing the latest in the multi-disciplinary orientations representing a cross-section of contemporary criminological theory. These sections include: 1: Classical and Rational Choice; 2: Biological and Biosocial; 3: Psychological; 4: Social Learning and Neutralization; 5: Social Control; 6: Social Ecology, Sub-cultural and Cultural; 7: Anomie and Strain; 8: Conflict and Radical; 9: Feminist and Gender; 10: Critical Criminologies: Anarchist, Postmodernist, Peacemaking. The articles were selected based on their contributions to advancing the field, including ways in which the authors of each chapter understand the current theoretical tendencies of their respective approaches and how they envision the future of their theories. Because of this, the articles focus on theory rather than empirical research. Of particular note is the tendency toward integration of different perspectives, as described by editors, Henry and Lukas, in their original introduction to this volume.

Social Control and Self-Control Theories of Crime and Deviance L. Edward Wells, 2017-07-05 Control theories have dominated criminological theory and research since the 1969 publication of Hirschi's seminal work on the social bond. Social control and self-control theorists are unique in suggesting that patterns in criminal behaviors are better explained by variations in social constraints rather than by individual motivational impulses, thus indicating that their main concerns are the explication and clarification of the techniques, processes, and institutions of informal social control. The four major sections of this volume focus on: the similarities and differences among the major contributors to the early developmental stage of social control theory; the central importance of parents, peers, and schools in the creation of informal control mechanisms and their link to crime and delinquency; the theoretical underpinnings of self-control theory, including empirical tests and criticisms; and theoretical integrations of social control and self-control theories with various motivational theories

of crime and delinquency.

*Rebooting Policy Analysis* Peter Linquiti, 2022-01-18 Rebooting Policy Analysis: Strengthening the Foundation, Expanding the Scope is a savvy introduction to policy analysis that gets students thinking, not just about how decisions should be made, but how they are made. The text highlights practical skills needed to advise decision-makers on matters of public policy in ways that are well-informed and solutions-oriented, while managing limitations like time, resources, and information. In a world that has become increasingly complex and partisan, the strength of policy analysis rests not only in its classical academic methods, but on the development of a practical, analytic mindset.

*Agency And Responsibility* Laura Ekstrom, 2018-03-08 A companion volume to *Free Will: A Philosophical Study*, this new anthology collects influential essays on free will, including both well-known contemporary classics and exciting recent work. *Agency and Responsibility: Essays on the Metaphysics of Freedom* is divided into three parts. The essays in the first section address metaphysical issues concerning free will and causal determinism. The second section groups papers presenting a positive account of the nature of free action, including competing compatibilist and incompatibilist analyses. The third section concerns free will and moral responsibility, including theories of moral responsibility and the challenge to an alternative possibilities condition posed by Frankfurt-type scenarios. Distinguished by its balance and consistently high quality, the volume presents papers selected for their significance, innovation, and clarity of expression. Contributors include Harry Frankfurt, Peter van Inwagen, David Lewis, Elizabeth Anscombe, John Martin Fischer, Michael Bratman, Roderick Chisholm, Robert Kane, Peter Strawson, and Susan Wolf. The anthology serves as an up-to-date resource for scholars as well as a useful text for courses in ethics, philosophy of religion, or metaphysics. In addition, paired with *Free Will: A Philosophical Study*, it would form an excellent upper-level undergraduate or graduate-level course in free will, responsibility, motivation, or action theory.

*Projective Simulation in Action* Hans J. Briegel, Thomas Müller, 2025-09-26 This open access monograph presents an in-depth study of the problem of how agency fits into the physical world. In particular, the authors focus on agency as a precondition of free will. They present a detailed and physically well motivated formal model to anchor their philosophical discussion. Coverage brings together perspectives from physics, computer science, and different branches of philosophy. The book describes the agency model of Projective Simulation, its physical realisability and its quantum extensions. It situates this model within the discussion of agency in philosophy and in Artificial Intelligence. In addition, the authors highlight the role of agency in Quantum Mechanics itself, recently stressed by the Bayesian-inspired interpretation of Quantum Mechanics, QBism. They provide a comprehensive exposition of Quantum Mechanics and a reflection on the embodied nature of agents. (Quantum) indeterminism turns out to be a key resource for Projective Simulation, and for agency in general. This establishes a novel connection between agency and phenomenology. Overall, the book provides a coherent picture of agents as

persisting physical entities endowed with active capacities. Such an explanation does not necessarily settle the question of the actual empirical basis of our human agency. It does, however, show that a coherent notion of agency is possible within a modern scientific world-view.

A Theory of Counterfactuals Igal Kvart, 1986

From Onions to Broccoli Patrick Girard, 2005

**Counterfactual Thinking - Counterfactual Writing** Dorothee Birke, Michael Butter, Tilmann Köppe, 2011-11-30

Counterfactuality is currently a hotly debated topic. While for some disciplines such as linguistics, cognitive science, or psychology counterfactual scenarios have been an important object of study for quite a while, counterfactual thinking has in recent years emerged as a method of study for other disciplines, most notably the social sciences. This volume provides an overview of the current definitions and uses of the concept of counterfactuality in philosophy, historiography, political sciences, psychology, linguistics, physics, and literary studies. The individual contributions not only engage the controversies that the deployment of counterfactual thinking as a method still generates, they also highlight the concept's potential to promote interdisciplinary exchange without neglecting the limitations and pitfalls of such a project. Moreover, the essays from literary studies, which make up about half of the volume, provide both a historical and a systematic perspective on the manifold ways in which counterfactual scenarios can be incorporated into and deployed in literary texts.

Counterfactual Conditionals and Logic Programs T. J. M. Bench-Capon, Imperial College of Science and Technology.

Department of Computing, 1987

**Hypothetical Knowledge and Counterfactual Reasoning** Joseph Y. Halpern, 1999 Samet introduced a notion of hypothetical knowledge and showed how it could be used to capture the type of counterfactual reasoning necessary to force the backwards induction solution in a game of perfect information. He argued that while hypothetical knowledge and the extended information structures used to model it bear some resemblance to the way philosophers have used conditional logic to model counterfactuals, hypothetical knowledge cannot be reduced to conditional logic together with epistemic logic. Here it is shown that in fact hypothetical knowledge can be captured using the standard counterfactual operator  $>$  and the knowledge operator  $K$ , provided that some assumptions are made regarding the interaction between the two. It is argued, however, that these assumptions are unreasonable in general, as are the axioms that follow from them. Some implications for game theory are discussed.

Thinking the Impossible Poonam Dohutia, 2009

**Logic and Society** Jon Elster, 1995

Counterfactual Reasoning Noel Hendrickson, 2008-10-15 Counterfactual reasoning is the process of evaluating conditional claims about alternate possibilities and their consequences (i.e., What If statements). These alternatives can be either past possibilities or future possibilities. Counterfactuals are essential to intelligence analysis because they are implicit in all strategic assessments. The process of counterfactual reasoning has three stages. The first two of these are somewhat counterintuitive and are easily ignored by analysts. First, one must establish the particular way in which the alternate possibility comes to be (i.e., develop its back-story). Second, one must evaluate the events that occur between the time of the alternate possibility and the time for which one is considering its consequences. And third, one must examine the possible consequences of the alternate possibility's back-story and the events that follow it. In doing so, an analyst must connect their conclusion to the specific type of strategic assessment the counterfactual will be used to support: decision making under risk or decision making under uncertainty. Includes notes, glossary and references. Noel Hendrickson is Director of the Institute for National Security Analysis.
