Consumer Survival Wendy Reiboldt,Melanie Horn Mallers,2013-11-26 Designed to empower readers to advocate for themselves and others, this wide-ranging encyclopedia reveals a surprising range of resources and options that consumers have at their disposal. The only book of its kind, this two-volume, alphabetically arranged reference covers a broad array of topics related to consumer rights, including those of interest to often-overlooked populations such as older adults, veterans, and the homeless. Specific entries address critical areas including food and product safety, housing, health care, the financial industry, the automobile industry, and telecommunications. The encyclopedia reviews the historical development of the consumer movement, examines beliefs and values that drive the movement, and identifies agencies and laws intended to safeguard consumers. Expert contributors discuss key current issues as well as those likely to arise in the future. Vignettes and case studies are used throughout, and various, sometimes contrasting viewpoints are shared to help readers better understand the content. Related topics are easily discovered through a see also list, and additional readings are provided at the end of each entry.

Non-Thermal Processing Technologies for the Grain Industry M. Selvamuthukumaran,2021-08-18 Food can rapidly spoil due to growth of microorganisms, and traditional methods of food preservation such as drying, canning, salting, curing, and chemical preservation can affect the quality of the food. Nowadays, various non-thermal processing techniques can be employed in grain processing industries to combat this. They include pulsed electric field processing, high pressure processing, ultrasonic processing, cold plasma processing, and more. Such techniques will satisfy consumer demand for delivering wholesome food products to the market. *Non-Thermal Processing Technologies for the Grain Industry* addresses these many new non-thermal food processing techniques that are used during grain processing and minimize microbial contamination and spoilage. Key Features: Explains the mechanism involved in application of cold plasma techniques for grain processing, and its strategy for inactivation of microbes by using this technique Deals with the effect of incorporation of electric pulses on quality aspects of various grain based beverage products. Details the innovative high pressure

processing techniques used for extraction of antioxidant from food grains Explores the safety issues and applications of non-thermal food processing techniques This book will benefit food scientists, food process engineers, academicians, students, as well as anyone else in the food industry by providing in-depth knowledge and emerging trends about non-thermal processing techniques in various grain-based food processing industries.

Lewis's Child and Adolescent Psychiatry Andrés Martin,Fred R. Volkmar,Melvin Lewis,2007 Established for fifteen years as the standard work in the field, Melvin Lewis's Child and Adolescent Psychiatry: A Comprehensive Textbook is now in its Fourth Edition. Under the editorial direction of Andrés Martin and Fred R. Volkmar—two of Dr. Lewis's colleagues at the world-renowned Yale Child Study Center—this classic text emphasizes the relationship between basic science and clinical research and integrates scientific principles with the realities of drug interactions. This edition has been reorganized into a more compact, clinically relevant book and completely updated, with two-thirds new contributing authors. The new structure incorporates economics, diversity, and a heavy focus on evidence-based practice. Numerous new chapters include genetics, research methodology and statistics, and the continuum of care and location-specific interventions. A companion Website provides instant access to the complete, fully searchable text.
