FLOOD EVALUATION, HAZARD DETERMINATION AND RISK MANAGEMENT / ÉVALUATION DES CRUES, DÉTERMINATION DES DANGERS ET GESTION DES RISQUES CIGB ICOLD,2025-04-14 Design criteria for the construction or rehabilitation of dams and hydraulic structures generally begin with a section defining the design flood. Flood determination methods have evolved over the years, but must continue to progress given the degree of uncertainty surrounding the assessment of extreme floods and the fact that factors external to flooding must be taken into account in risk assessment. This ICOLD Bulletin 187 follows in the footsteps of the previous one. It consists of three main chapters following the introductory chapter. The second chapter examines the main aspects of flood volume. The third chapter follows on from the previous bulletin and looks in more detail at stochastic approaches to flood risk assessment. The final chapter deals with the forecasting aspects of proactive flood management. Case studies illustrating short-, medium- and long-term management challenges are presented in Appendix A. Les critères de conception pour la construction ou la réhabilitation des barrages et des structures hydrauliques commencent généralement par une section définissant la crue de projet. Les méthodes de détermination des crues ont évolué au fil des ans, mais elles doivent continuer à progresser étant donné le degré d'incertitude concernant l'évaluation des crues extrêmes et le fait que les facteurs externes aux crues doivent être pris en compte dans l'évaluation des risques. Ce ICOLD Bulletin 187 suit les traces du précédent bulletin. Il se compose de trois

chapitres principaux faisant suite au chapitre d'introduction. Le deuxième chapitre examine les principaux aspects liés au volume des crues. Le troisième chapitre fait suite au bulletin précédent et aborde plus en détail les approches stochastiques concernant l'évaluation des risques de crues. Le dernier chapitre traite des aspects prévisionnels liés à la gestion proactive des crues. Des études de cas illustrant les défis de gestion à court, moyen ou long terme sont présentées à l'annexe A.

Socio-Economic Approach to Management Treatise Henri Savall, Veronique Zardet, 2023-05-01 The result of half a century of research and experimentation in economics and management, this Treatise is intended for management practitioners. Socio-economic management (SEAM) makes the demands of humanism in professional life and sustainable economic prosperity compatible. It is illustrated with numerous cases from 2,150 companies and organizations from a wide variety of sectors and presents observed and measured results. Most of these chapters are written jointly by managers or executives of companies and organizations, and scholars or consultants involved in the pilot actions. This book is the work of 193 authors, from 16 countries and 4 continents, practitioners or academics in management sciences and management. This reflects the diversity of national and sectoral contexts of SEAM applications. Some chapters situate this concept in relation to the major currents of current thought. Each chapter is preceded by abstracts in French, English and Spanish. The prefaces, signed by Herman Aguinis and Rene Ricol, show the scope of socio-economic theory and management beyond the borders of the company. The book illustrates the international influence (48 countries) of the innovative and robust methods created and developed by the ISEOR team. Socio-economic theory constitutes a breakthrough innovation, both in terms of its conceptual contribution and the practical methods and tools of its applications. This holistic approach touches on the different functions of the company and its multiple problems. It provides a structured change management method, focused on stimulating Human Potential and on self-financing the development of the company or organization, through the periodic recycling of hidden costs.

Proceedings of the 3rd International Conference of Economics and Management (CIREG 2016) Volume II Houcine Berbou, Aziz Fassouane, Mustapha Belaissaoui, 2020-04-06 This book brings together papers presented at the 3rd Conference of Research in Economics and Management (CIREG) held in Morocco in May 2016. With a focus on the challenges of SMEs and innovative solutions, they highlight the contribution of researchers in the fields of business and management, with all their micro and macro-economic aspects. They shed light on the universal scientific vision of the importance of SMEs with answers relevant to their local context and adapted to their specific national situation. The relevance of SME research lies in its heuristic value of analyzing change, rather than in constructing a category, a particularly useful empirical concept. This third volume is focused on marketing and human resources.

Innovation and Creativity in SMEs Claudine Gay, Berangere L. Szostak, 2019-08-16 In order to survive in their market and differentiate themselves from the competition, small- and medium-sized enterprises (SMEs), which represent more than 90%

of companies worldwide, need to be creative and innovative. This book presents a conceptual framework for thinking about innovation and creativity in SMEs. It takes into account their strategic relation to their environment and the economic, technological and social changes that they face. Their ability to enhance their creativity with new ideas and to legitimize them during their implementation is also taken into account
