Linda Courtenay Botterill, Alan Fenna

Agendas, Alternatives and Public Policies John W. Kingdon, 2014 Kingdon's landmark work on agenda setting and policy formation is drawn from interview conducted with people in and around the U.S. federal government, and from case studies, government documents, party platforms, press coverage, and public opinion surveys. While other works examine how policy issues are decided, Kingdon's book was the first to consider how issues got to be issues. This enduring work attempts to answer the questions: How do subjects come to officials' attention? How are the alternatives from which they choose generated? How is the governmental agenda set? Why does an idea's time come when it does? Longman is proud to announce that *Agendas, Alternatives, and Public Policies* has been reissued in this Longman Classics edition, featuring a new epilogue: Health Care Reform from Clinton to Obama. Comparing the Clinton administration in 1993 with the Obama administration in 2009 and 2010, Kingdon analyses how agenda setting, actors, and alternatives affect public policy.

Implementing Innovation Toddi A. Steelman, 2010-04-15 Over the past three decades, governments at the local, state, and federal levels have undertaken a wide range of bold innovations, often in partnership with nongovernmental organizations and communities, to try to address their environmental and natural resource management tasks. Many of these efforts have failed. Innovations, by definition, are transitory. How, then, can we establish new practices that endure? Toddi A. Steelman argues that the key to successful and long-lasting innovation must be a realistic understanding of the challenges that face it. She examines three case studies—land management in Colorado, watershed management in West Virginia, and timber management in New Mexico—and reveals specific patterns of implementation success and failure. Steelman challenges conventional wisdom about the role of individual entrepreneurs in innovative practice. She highlights the institutional obstacles that impede innovation and its longer term implementation, while offering practical insight in how enduring change might be achieved.

Interrogating Public Policy Theory Linda Courtenay Botterill, Alan Fenna, 2019 This book questions the way policy making has been distanced from politics in prevailing theories of the policy process, and highlights the frequently overlooked ubiquity of values and values conflicts in politics and policy. It examines the strengths and weaknesses of current theories, reviews the illusions of rationalism in politics, and explores the way values are implicated throughout the democratic process, from voter choice to policy decisions. It argues that our understanding of public policy is enhanced by recognizing its intrinsically political and value-laden nature.

Presidential Rhetoric on Terrorism under Bush, Obama and Trump Gabriel Rubin, 2020-03-21 Through the analysis of eighteen years of presidential data, this book shows how Presidents Bush, Obama, and Trump have conducted and framed the war on terror since its inception in 2001. Examining all presidential speeches about terrorism from George W. Bush's two terms as President, Barack Obama's two terms as President, and Donald Trump's first year as President, this book is the first to compare the three post-9/11 presidents in how they have dealt with the terror threat. Presidential Rhetoric on Terrorism under Bush, Obama, and Trump argues that when policies need to be "sold" to the public and Congress, presidents make their pertinent issues seem urgent through frequent speech-making and threat inflation. It further illustrates how after policies are sold, a new President's reticence may signify quiet acceptance of the old regime's approach. After examining the

conduct of the war on terror to date, it concludes by posing policy suggestions for the future.

Decision-Making under Ambiguity and Time Constraints Reimut Zohlnhöfer, Friedbert W Rüb, 2016-02-24 Policy issues have grown ever more complex and politically more contestable. So governments in advanced democracies often do not understand the problems they have to deal with and do not know how to solve them. Thus, rational problem-solving models are highly unconvincing. Conversely, the Multiple-Streams Framework starts out from these conditions, which has led to increasing interest in it. Nevertheless, there has not yet been a systematic attempt to assess the potential of such scholarship. This volume is the first attempt to fill that gap by bringing together a group of international scholars to assess the strengths and weaknesses of the Framework from different angles. Chapters explore systematically and empirically the Framework's potential in different national contexts and in policy areas from climate change and foreign policy to healthcare and the welfare state.

Beyond Sputnik Homer Alfred Neal, Tobin Smith, Jennifer McCormick, 2010-09-22 Science and technology are responsible for almost every advance in our modern quality of life. Yet science isn't just about laboratories, telescopes and particle accelerators. Public policy exerts a huge impact on how the scientific community conducts its work. *Beyond Sputnik* is a comprehensive survey of the field for use as an introductory textbook in courses and a reference guide for legislators, scientists, journalists, and advocates seeking to understand the science policy-making process. Detailed case studies---on topics from cloning and stem cell research to homeland security and science education---offer readers the opportunity to study real instances of policymaking at work. Authors and experts Homer A. Neal, Tobin L. Smith, and Jennifer B. McCormick propose practical ways to implement sound public policy in science and technology and highlight how these policies will guide the results of scientific discovery for years to come. Homer A. Neal is the Samuel A. Goudsmit Distinguished University Professor of Physics, Interim President Emeritus, and Vice President for Research Emeritus at the University of Michigan, and is a former member of the U.S. National Science Board. Tobin L. Smith is Associate Vice President for Federal Relations at the Association of American Universities. He was formerly Assistant Director of the University of Michigan and MIT Washington, DC, offices. Jennifer B. McCormick is an Assistant Professor of Biomedical Ethics in the Division of General Internal Medicine at the Mayo College of Medicine in Rochester, Minnesota, and is the Associate Director of the Research Ethics Resource, part of the Mayo Clinic's NIH Clinical Translational Science Award research programs. Social Security Daniel Béland, 2005 Compact, timely, well-researched, and balanced, this institutional history of Social Security's seventy years shows how the past still influences ongoing reform debates, helping the reader both to understand

and evaluate the current partisan arguments on both sides.

The War Against Regulation Phillip J. Cooper, 2009 A concise survey and analysis of presidential attempts over the last thirty years--by Democrats and Republicans alike--to dismantle the regulatory state that first appeared under FDR. Argues that the war against regulation failed and that its excesses remind us of the value and proper role of regulation in American government.

Cooperative Pluralism Andrew S. McFarland, 1993

Beyond Sputnik Homer A. Neal, 2008

All in the Family Patricia Strach, 2007 All in the Family demonstrates how policymakers employ family across a host of policy areas to achieve their non-family goals and the consequences this has for policy stability over time.

Governance by Decree Ruth P. Morgan, 2004 The Voting Rights Act of 1965, which originally was intended to prohibit barriers to black registration and voting, has been hailed as a triumph for civil rights and as a catalyst for the election of minorities to public office in both the Deep South and the urban North. To advance its objective, federal courts instructed many cities to change from at-large to single-member district electoral systems as a way to ensure that minorities had a reasonable chance to elect representatives of their choice. In the first book to critique the implementation of this landmark legislation in a major American city, Ruth Morgan examines its effect on local governance over forty years in Dallas and shows that it had unintended consequences for racial politics, representation, and public policy. Breaking from studies that measure the success of the VRA in terms of increased minority representation, Morgan assesses the consequences of the Act for Dallas city government—and for the wider interests of minorities as well. While endorsing the original intent of the VRA, Morgan believes that this intent was subverted by subsequent amendments to the Act and by the courts' attempts to advance the political standing of particular minority groups. She argues that court-imposed single-member districts have created in Dallas a city council infected with parochialism and careerism—a result of members no longer having to compromise to win citywide votes—and have had an adverse impact on governmental effectiveness and voter turnout. With corruption and cronyism now rampant, voting rights legislation and litigation have ultimately failed to fulfill the hopes and aspirations of the unempowered, and the district system has created an incentive for continued racial separation. Governance by Decree offers a pointed assessment of the complexities and contradictions produced by the voting rights law, while at the same time calling for the federal judiciary to exercise restraint in imposing its will when it lacks the capacity to make choices that are inherently political. Morgan's powerfully argued case study should inspire much debate and inform forthcoming congressional deliberations over the renewal of the preclearance section of the VRA in 2007.

Culture Wars and Local Politics Elaine B. Sharp, 1999 This collection offers alternative explanations of local actions with a focus on conflict. It features examples of experiences selected from various cities. It examines how the responses of local

governments to specific issues are influenced by such factors as political culture and institutions.

Unlikely Environmentalists Paul Charles Milazzo, 2006 Reveals how boosters, bureaucrats, and engineers--not grassroots protesters--were truly the ones responsible for spearheading the passage of the Clean Water Act of 1972. How these unlikely protagonists helped to pass the era's most far-reaching regulatory law gives us rare insight into how Congress was able to take the lead in addressing those concerns, namely in the form of water quality issues.
