Rock Aesthetics in Colombian Literature and Culture David Martinez Houghton, 2024-10-15 Rock Aesthetics in Colombian Literature and Culture: Writing the Noise explores the presence of a rock aesthetic in the Colombian literary field and how its pivotal role in creating alternative creative expressions that challenge the dominance of tropicality as the prevailing artistic reference. More than a musical genre or a cultural industry, rock is also an aesthetic: a significant social practice that allows one to understand what people consider beautiful or authentic. Since its birth in the mid-1950s, rock as an aesthetic has expanded worldwide, transforming and establishing dialogues with artistic practices such as literature. Through an analysis of a series of novels, poems, and manifestos written from the 1950s to the early years of the twenty-first century, David Martínez Houghton embarks on a literary, musical, and historical journey. On the way, he explores complex phenomena such as urban violence, the formation of youth identities, the penetration of pop culture, national identity discourses, and even the social and physical transformation of Colombian cities.

Canadian Reference Sources Mary E. Bond, Martine M. Caron, 1996 This bibliography cites those Canadian and foreign reference sources that describe Canadian people, institutions, organizations, publications, art, literature, languages, and history. It lists books of a general nature as well as works in the disciplines of history and the humanities. These large divisions are then broken down by subject, genre, type of document, and province or territory. Titles of national, provincial/territorial, or regional interest are included in every subject area when available. The contents of the book are indexed four ways: by name, title, French subject, and English subject. And to facilitate browsing, the major reference books (those dealing with more than one subject or a large geographical region) are also cross-referenced. Two entries have been created for each bilingual document in order to provide access and bibliographical descriptions in both of Canada's official languages. Entries for unilingual works include citation in the language of the publication and a bilingual annotation. The annotations are descriptive and provide information on the content, arrangements, and indexing of works; the

availability of non-print formats; previous editions and title changes; and related works. Canadian Reference Sources will be an invaluable reference tool for future scholars and researchers.

Exploring Research Neil J. Salkind, 1997 Book's content and also references for related works of fiction, and other material of a more informal nature. For Psychologists, Management and Business persons or other social or behavioral science-related professionals who are looking to sharpen their understanding of research methods.

The Pauline Effect Jennifer R. Strawbridge, 2015-11-13 This study offers a fresh approach to reception historical studies of New Testament texts, guided by a methodology introduced by ancient historians who study Graeco-Roman educational texts. In the course of six chapters, the author identifies and examines the most representative Pauline texts within writings of the ante-Nicene period: 1Cor 2, Eph 6, 1Cor 15, and Col 1. The identification of these most widely cited Pauline texts, based on a comprehensive database which serves as an appendix to this work, allows the study to engage both in exegetical and historical approaches to each pericope while at the same time drawing conclusions about the theological tendencies and dominant themes reflected in each. Engaging a wide range of primary texts, it demonstrates that just as there is no singular way that each Pauline text was adapted and used by early Christian writers, so there is no homogeneous view of early Christian interpretation and the way Scripture informed their writings, theology, and ultimately identity as Christian.
