**Lucinda Elaine Remilton**

**Rehabilitation Outcome Measures** Emma K Stokes, 2010-12-14 Rehabilitation Outcome Measures is a comprehensive review and comparison of measurement instruments in rehabilitation. It includes a high-level section on professional practice in physiotherapy and an introduction to the World Health Organisation's (WHO) International Classification of Health. For those who wish to learn more about the relevance of reported measurement properties, the text focuses on how this knowledge can assist clinical decision-making. Additionally, the book reviews a range of measurements in neurological rehabilitation as well mobility, fatigue, physical activity and patient satisfaction. Rehabilitation Outcome Measures is directed at students preparing for clinical practice, as well as researchers and practitioners seeking information about a range of measurement instruments. - Provides details on how to manage a project and select an outcome measure - Introduction to WHO's International Classification of Functioning, Disability and Health - Boxes with specific links to clinical decision-making - Easy format for review of measurement possibilities in each domain - Clear review of 36 measurement instruments

Occupational Therapy Assessments for Older Adults Kevin Bortnick, 2024-06-01 The role of measurement and the benefits of outcome measures are defined as important tools used to document change in one or more constructs over time, help to describe a client's condition, formulate a prognosis, as well as to evaluate the effects of occupational therapy intervention. Occupational Therapy Assessments for Older Adults: 100 Instruments for Measuring Occupational Performance presents over 100 outcome measures in the form of vignettes that encompass a brief description of each instrument, a review of its psychometric properties, its advantages and disadvantages, administration procedures, permissions to use, author contact information, as well as where and how to procure the instrument. Occupational Therapy Assessments for Older Adults by Dr. Kevin Bortnick narrows down the list of possible choices for the occupational therapy student or clinician to only those with an amount of peer review, bibliographic citations, as well as acceptance within the profession. The text also includes research-based information with text citations and has over 100 tables, diagrams, and figures. Included in the review of each outcome measure: Description: A brief record of the measure. Psychometrics: A review of the level of research evidence that either supports or does not support the instrument, including such items as inter-rater, intra-rater, and test-retest reliabilities, as well as internal consistencies and construct validities among others. Advantages: Synopsis of the benefits of using the measure over others including its unique attributes. Disadvantages: A summary of its faults. For example, the

amount of research evidence may be limited or the measure may be expensive. Administration: Information regarding how to administer, score, and interpret results. Permissions: How and where to procure the instrument, such as websites where it may be purchased or journal articles or publications that may contain the scale. Summary: A brief summation of important information. Occupational Therapy Assessments for Older Adults: 100 Instruments for Measuring Occupational Performance encourages occupational therapy and occupational therapy assistants to expand their thinking about the use of appropriate outcome measures with older adult populations. Using the appropriate outcome measure based on evidence can aid in the promotion of health, well-being, and participation of clients.

### **Neurologic Rehabilitation, Second Edition: Neuroscience and Neuroplasticity in Physical Therapy Practice**

Deborah S. Nichols Larsen, Deborah K. Kegelmeyer, John A. Buford, Anne D. Kloos, Jill C. Heathcock, D. Michele Basso, 2024-02-16 This expert guide integrates full-color illustrations with neuromuscular skeletal content to help readers quickly and effectively master this topic A Doody's Core Title for 2024! Providing comprehensive coverage of the structure and function of the human nervous system, Neurorehabilitation in Physical Therapy discusses normal motor development and motor control, as well as common treatment techniques in physical therapy. In order to help students master this subject, cases open each chapter and questions about those cases appear throughout the chapter. The text includes numerous tables, flow charts, illustrations, and multiple-choice board-style review questions and is enhanced by a roster of world-renowned clinical contributors.

**Training in Neurorehabilitation** Sabine Lamprecht, Hans Lamprecht, 2018-01-24 Training in Neurorehabilitation The importance of physical therapy for neurological disease cannot be underestimated. Stroke, for example, is the second leading cause of death worldwide, and its global effect is considerable, based on disability-adjusted life years. With an aging population, the risk of stroke increases exponentially with age, and accordingly, the number of patients increases as well. It follows that specially tailored neurorehabilitation regimens are crucial in helping patients return to the workplace and maintain their independence. This concise and practical work, created by authors with decades of experience in the practice and teaching of physical therapy, serves that purpose well, with its emphasis on the targeted use of training equipment to match the patients' exact needs. Key Features: Concise, practical, and goal-oriented Provides expert guidance in creating individualized training regimens with the goal of training and enhancing endurance, strength, and balance An emphasis on types of equipment and instructions for their use, tailored specifically the individual needs of patients All training exercises are well illustrated for optimal understanding Author team with more than 30 years' experience in practice and teaching of physical therapy Lamprecht's Training in Neurorehabilitation is certain to be an essential reference for all students and practitioners in physical therapy involved in the treatment of patients with neurological disorders.

**Neurologic Rehabilitation: Neuroscience and Neuroplasticity in Physical Therapy Practice (EB)** Deborah S. Nichols Larsen, Deborah K. Kegelmeier, John A. Buford, Anne D. Kloos, Jill C. Heathcock, D. Michele Basso, 2015-11-22 A full-color neuroscience text that skillfully integrates neuromuscular skeletal content Covers both pediatric and adult issues Beautiful full-color presentation with numerous images Neurorehabilitation in Physical Therapy delivers comprehensive coverage of the structure and function of the human nervous system. It also discusses normal motor development and motor control, as well as common treatment techniques in physical therapy. In order to be engaging to students, cases open each chapter, with questions about those cases appearing throughout the chapter. The text includes numerous tables, flow charts, illustrations, and multiple-choice board-style review questions and is enhanced by a roster of world-renowned clinical contributors.

*Measuring Disease* Ann Bowling, 2001-05 Anyone seeking to identify potentially useful disease-specific measures for their study will find this a good starting point. Quality of Life Research Praise for the first edition: ...text that is remarkably detailed and comprehensive in its coverage of a range of quality of life measures...Bowling's book provides an important step towards the development of measures of quality of life that are both sensitive and rigorous. - Journal of Epidemiology & Community Health ...a most useful and comprehensive addition to the literature...The book is readable, well referenced and up to date. I recommend any group that wishes to attempt to measure health outcomes to consider adding this book to their resource list. - Australian Health Review ...this book gives an in-depth and comprehensive insight in health-related quality of life scales...a most valuable guide in helping the reader search for the scale with the best psychometric properties. Furthermore, this book will contribute highly to the improvement of disease-specific measurement of quality of life and to the comparability of measurement results. - Journal of Health Psychology This is a thoroughly updated and revised edition of *Measuring Disease*. It supplements the author's previous work *Measuring Health* (2nd edition). In assessing the outcome of disease and treatments, measurement scales must be relevant to their specific effects, necessitating the use of disease specific questionnaires. There is now considerable interest in measures which are multi-dimensional, and which are more sensitive than generic measures to specific disease and treatment effects. This book reviews disease specific measures of quality of life and, where relevant, popularly used symptom and single dimension scales. It is intended as a source book for researchers, medical and health care practitioners who are involved in the measurement of the outcome of health services.

**The Australian Journal of Physiotherapy**, 2000

*Writing Case Reports* Irene McEwen, 2001 The second edition of this resource offers more writing aids than before--including updated reference lists for reliability and validity studies, more case report examples from both the physical therapy and occupational therapy literature, a case report writer's checklist, and a review of a submitted case report

The Reliability and Validity of the Elderly Mobility Scale (EMS) in the Acute Hospital Setting Lucinda Elaine Remilton, 2005 Statistically proven outcome measures are becoming increasingly important to confirm the efficacy of physiotherapy treatment and to continue to gain funding in today's competitive market for the health care dollar. The aim of this two-phase study was to determine whether the Elderly Mobility Scale (EMS) was a valid and reliable outcome measurement tool for measuring mobility in the acute hospital setting. Phase one of the study evaluated the concurrent validity. English speaking patients over the age of 54 who had an acute care admission to the Flinders Medical Centre, Adelaide, South Australia, during December 2004 and who were referred to physiotherapy for a mobility assessment were invited to participate. Thirty-two subjects had their mobility assessed using the EMS and Modified Rivermead Mobility Index (MRMI). Phase two evaluated the inner and intra-rater reliability of the EMS. Eighteen physiotherapists viewed nine mobility assessment videos and scored them using the EMS. Viewing took place on two occasions, one week apart and the physiotherapists were blinded to each other's scores.

**Physiotherapy in Stroke Management** Marilyn A. Harrison, 1995 Based on papers presented at the first WCPT-Europe Congress in Copenhagen in June 1994, this is a guide to current practice of physiotherapy in stroke management. It brings together the latest approaches to physiotherapy care from around the world.

**Fisioterapia en la rehabilitación neurológica** Maria Stokes, Emma Stack, 2013-05-26 Obra que recoge los numerosos avances que se han producido a lo largo de los últimos años en el uso de la fisioterapia para la recuperación de pacientes con problemas o secuelas neurológicos. Todos los capítulos de este título están basados en investigaciones reales, lo que hace que predomine un enfoque basado en la evidencia. Obra que ofrece al fisioterapeuta una visión totalmente actualizada de los principios básicos de la rehabilitación neurológica. Los contenidos han sido revisados en profundidad. Se incluyen cuatro capítulos nuevos respecto a la edición anterior. Obra de gran utilidad para el profesional pero también para el estudiante de grado, sobre todo para cubrir la asignatura de Fisioterapia Neurológica.

**Principles of Neurologic Rehabilitation** Richard B. Lazar, 1998 Definitive text summarizes the latest scientific developments in the burgeoning field and correlates them with their clinical significance. Coverage reviews basic science of nerve damage and regeneration with outcome and efficacy studies and evaluation guidelines for all neurologic disorders. Next, therapeutic rationales and step-by-step detail of rehabilitative technique are presented. Includes gait analysis and locomotion, sexual dysfunction, degenerative disease, speech and hearing disorders, neuropharmacology, and much more.

**Neurologic Rehabilitation** Bruce H. Dobkin, 1996 Dobkin (Director, Neurologic Rehabilitation and Research, U. of

California Los Angeles School of Medicine) examines clinical disorders that arise during the rehabilitation of diseases of the central and peripheral nervous systems. His findings concentrate on aspects of motor control, muscle plasticity, and cognitive processes as they relate to the rehabilitation teams' role in assessment and practice. He comprehensively discusses specific issues in the areas of stroke, spinal cord injury, traumatic brain injury, Parkinson's Disease, multiple sclerosis, and other neurologic disorders. *The Hospital Neurology Book* Arash Salardini, Jose Biller, 2016-04-22 A practical, protocol-oriented guide to the practice of neurology in the hospital setting A Doody's Core Title for 2019! Hospital neurology is one of the fastest growing subspecialties within neurology. Running an efficient and effective neurohospitalist line is important to the financial success of hospitals and the physicians employed there. Many neurology patients also have internal medicine problems, and often it is a general hospitalist without neurology training who treat these patients. These physicians sorely need more information on neurology. Conversely, neurologists caring for these patients have only had one year of internal medicine training and require more guidance on medical problems. Given these realities, there is a need for a resource on hospital neurology. With *The Hospital Neurology Book*, Drs. Salardini and Biller have created a practical, concise, and useful work that guides both neurologists and internists in the areas in which their training is currently not sufficient for hospital practice. *The Hospital Neurology Book* features a highly readable format, providing information physicians can act upon, including recipes and protocols for patient care and question-based chapter headings that lead physicians to the exact issue they are dealing with in the moment. Each chapter (or chapter section as appropriate) opens with a case study, setting the stage in a highly practical manner, and ends with high yield summary points useful for consolidating learning.
