Minerals Yearbook, 2009, V. 3, Area Reports, International, Latin America and Canada ,2011-10-30 The Minerals Yearbook is an annual publication that reviews the mineral and material industries of the United States and foreign countries. The Yearbook contains statistical data on materials and minerals and includes information on economic and technical trends and development. The Minerals Yearbook includes chapters on approximately 90 commodities and over 175 countries. This volume of the Minerals Yearbook provides an annual review of mineral production and trade and of mineral-related government and industry developments in more than 175 foreign countries. Each report includes sections on government policies and programs, environmental issues, trade and production data, industry structure and ownership, commodity sector developments, infrastructure, and a summary outlook.

**Sovereign Forces** John-Andrew McNeish,2021-06-11 Sovereignty is a significant force regarding the ownership, use, protection and management of natural resources. By placing an emphasis on the complex intertwined relationship between natural resources and diverse claims to resource sovereignty, this book reveals the backstory of contemporary resource contestations in Latin America and their positioning within a more extensive history of extraction in the region. Exploring cases of resource contestation in Bolivia, Colombia and Guatemala, Sovereign Forces highlights the value of these relationships to the practice of environmental governance and peacebuilding in the region.

**Breaking Ground** Rose J. Spalding,2023 From cave-ins and lung diseases to toxic sludge and water contamination, mining operations create a host of social and environmental problems, now including climate change. Breaking Ground tells

the story of mining conflicts in Latin America, where ore extraction has become a big business. Based on a decade of research in gold mining towns, corporate headquarters, and legislative chambers, Rose J. Spalding develops a new interpretation of how mining operations secure government approval while also unpacking the circumstances under which anti-mining mobilizations come out on top. This innovative study of the mining sector's rise and fall answers persistent questions about the political logistics shaping the future of resource extraction.

**Hazardous Child Labour in Latin America** G.K. Lieten,2011-01-21 In order to bridge the lack of information on child labour and to stimulate policy interventions the IREWOC Foundation (International Research on Working Children) has undertaken action-based research in the field of the worst forms of child labour in Latin America. In 2006 and 2007 a comparative study on the Worst Forms of Child Labour was carried out in 7 different economic sectors in Bolivia, Guatemala and Peru focussing on the hazardous worst forms. The central research objectives were as follows: • to map the working and living situations of children who are working in specific economic sectors and what the consequences of this work are for their physical and emotional wellbeing. • to investigate the reasons why these children are working in these worst forms sectors. The research results were expected to give important insights into the currently polarised debate between those who state child labour is above all related to cultural considerations and those who state that economic reasons are fundamental to the phenomena of child labour. • to map the existing policy initiatives for child labourers in the worst forms and to identify the best practices. In the face of challenges imposed by achieving the Millennium Development Goals (MDGs) set by the UN, specific attention was paid to educational initiatives. Is education a useful tool in combating child labour, and vice versa, is child labour a significant obstacle to achieving universal primary education? Although the evidence from the various cases discussed in the book illustrate positive trends in terms of the worst forms of child labor, thousands of children were still found to be engaged in activities that form a direct threat to their physical, mental and moral health and jeopardize their education. This book proposes several practical recommendations for possible interventions.
