

The Great Inca Road

Elisée Reclus

The Great Inka Road Ramiro Matos, Jose Barreiro, 2015-09-08 This compelling collection of essays explores the Qhapaq nan (or Great Inca Road), an extensive network of trails reaching modern-day Colombia, Ecuador, Peru, Bolivia, Chile, and Argentina. These roads and the accompanying agricultural terraces and structures that have survived for more than six centuries are a testament to the advanced engineering and construction skills of the Inca people. The Qhapaq nan also spurred an important process of ecological and community integration across the Andean region. This book, the companion volume to a National Museum of the American Indian exhibition of the same name, features essays on six main themes: the ancestors of the Inca, Cusco as the center of the empire, road engineering, road transportation and integration, the road in the Colonial era, and the road today. Beautifully designed and featuring more than 225 full-color illustrations, *The Great Inka Road* is a fascinating look at this enduring symbol of the Andean peoples' strength and adaptability.

Indigenous Ecotourism Heather Zeppel, 2006 Drawing on case studies from Pacific Islands, Africa, Latin America and Southeast Asia, this book examines ecotourism enterprises controlled by indigenous people in tribal reserves or protected areas. It compares indigenous ecotourism in developed and developing countries and covers cultural ecotours, ecolodges, and bungalows, hunting and fishing tours, cultural attractions and other nature-based facilities or services.

Earth Shapers Maxim Samson, 2025-08-07 'A riposte to the idea that geography is destiny' FINANCIAL TIMES 'Samson demonstrates how we are not always prisoners of geography but, increasingly, its masters' LEWIS DARTNELL 'This is a book that reshapes our story of global human geography' DANNY DORLING 'Accessible and erudite, this is an original look at the geography of connection' LEWIS BASTON Mountains, meridians, rivers and borders; these are some of the features that carve up the world on our maps and in our minds. But geography is far less set in stone than we might believe and, over time, we have become experts at reshaping our surroundings. From the Qhapaq Ñan, South America's 'Great Road', and the Panama Canal to Mozambique's railways and Korea's sacred Baekdu-daegan mountain range, Samson explores how we mould the world around us. And how, as we etch our needs onto the natural landscape, we alter the course of history. An immense work of cultural geography touching on ecology, sociology, history and politics, *Earth Shapers* argues that, far from being constrained by geography, we are instead its creators.
