Conventional and Original Metaphors in French Autobiography Madalina Akli, 2009 This book studies three autobiographies, each of which is at least partially devoid of chronological structure: Sartre's *The Words*, Perec's *W or The Memory of Childhood*, and Sarraute's *Childhood*. Calendar-based order, traditionally associated with autobiography, fails to provide the coherence the readers expect. Hence, readers must create a sense of coherence at another level by using their conceptual resources. *Conventional and Original Metaphors in French Autobiography* reveals that in these literary texts coherence is maintained based on the exploitation of conventional metaphors taken from everyday language, which the autobiographers transform in a creative yet familiar manner. These common metaphors offer guidance to readers and establish coherence between the shared life experiences of reader and autobiographer. In the course of reading, the autobiographers' and the readers' life experiences overlap through familiar metaphors, which serve as organizational devices in writing and as guiding principles in reading.

**Morning and Evening Meditations from the Word of God** Michael J. Akers, 2014-03-18 There are many devotional books available containing brief, daily inspirations that benefit all who read them. This book is different in two respects. The first is obvious: it contains two readings per day—732 in all. The second, more important difference is that the author wanted to do more than offer inspiration; this would make this book no different than so many others. The messages in the book are study sketches in that the content is not only inspirational, but also educational, challenging, and encouraging. Most of these writings were based on author Michael J. Akers's teaching of adult Bible studies for more than thirty years and learning what really brought adults to want to deepen their knowledge and application of the Word of God.

Mickey Newbury Crystal & Stone Joe Ziemer, 2015-07-10 What do Tom Jones, Nick Cave, Joan Baez, John Denver, Ray Charles, Del Shannon, Keith Richards, B.B. King, Roy Orbison, Johnny Cash, Carol Channing, Manowar and Linda Ronstadt... have in common? Mickey Newbury. They recorded his songs. Matter of fact, Newbury's material has been covered by over

1,230 artists. That is just about everybody. His inspirational ballad An American Trilogy has been recorded by more than 550 artists. It was Elvis' showstopper. His Just Dropped In (To See What Condition My Condition Was In) is the rocker that launched Kenny Rogers' career into the stratosphere. Newbury, who grew up on Houston's tough North side, is the only songwriter to place four top hits on four different charts... simultaneously. The train hopper was also instrumental in mentoring Kris Kristofferson, who says, God, I learned more about songwriting from Mickey than I did any other single human being. He was my hero and still is. Shotgun Willie Nelson adds, He was one of the best writers we've ever had and one of the best friends I've ever had. And that is not all. Newbury's albums enjoy an extensive cult following. Peers consider him among the best of the best, and many artists refer to his albums as perfect. Some call him a modern day Stephen Foster. Why then is Newbury known mainly to insiders? A well-kept secret? Too good for the masses? Two truths can be stated: The man cannot be pigeonholed, and he refused to sell out. Like crystal and stone, Newbury's fascinating story is clearly and solidly laid out. It may even change a few truths. As he wrote, Time has a way of changing everything Truth has a way of changing all the time.

**Multiple Criteria Decision Analysis for Industrial Engineering** Gerald William Evans,2016-12-01 This textbook presents methodologies and applications associated with multiple criteria decision analysis (MCDA), especially for those students with an interest in industrial engineering. With respect to methodology, the book covers (1) problem structuring methods; (2) methods for ranking multi-dimensional deterministic outcomes including multiattribute value theory, the analytic hierarchy process, the Technique for Order Preference by Similarity to Ideal Solution (TOPSIS), and outranking techniques; (3) goal programming,; (4) methods for describing preference structures over single and multi-dimensional probabilistic outcomes (e.g., utility functions); (5) decision trees and influence diagrams; (6) methods for determining input probability distributions for decision trees, influence diagrams, and general simulation models; and (7) the use of simulation modeling for decision analysis. This textbook also offers: · Easy to follow descriptions of how to apply a wide variety of MCDA techniques · Specific examples involving multiple objectives and/or uncertainty/risk of interest to industrial engineers · A section on outranking techniques ; this group of techniques, which is popular in Europe, is very rarely mentioned as a methodology for MCDA in the United States · A chapter on simulation as a useful tool for MCDA, including ranking & selection procedures. Such material is rarely covered in courses in decision analysis · Both material review questions and problems at the end of each chapter . Solutions to the exercises are found in the Solutions Manual which will be provided along with PowerPoint slides for each chapter. The methodologies are demonstrated through the use of applications of interest to industrial engineers, including those involving product mix optimization, supplier selection, distribution center location and transportation planning, resource allocation and scheduling of a medical clinic, staffing of a call center, quality control, project management, production and inventory control,and so on. Specifically, industrial engineering problems are structured as classical problems in multiple criteria decision analysis, and the relevant methodologies are demonstrated.
