Observing the Volcano World Carina J. Fearnley, Deanne K. Bird, Katharine Haynes, William J. McGuire, Gill Jolly, 2018-07-13 This open access book provides a comprehensive overview of volcanic crisis research, the goal being to establish ways of successfully applying volcanology in practice and to identify areas that need to be addressed for future progress. It shows how volcano crises are managed in practice, and helps to establish best practices. Consequently the book brings together authors from all over the globe who work with volcanoes, ranging from observatory volcanologists, disaster practitioners and government officials to NGO-based and government practitioners to address three key aspects of volcanic crises. First, the book explores the unique nature of volcanic hazards, which makes them a particularly challenging threat to forecast and manage, due in part to their varying spatial and temporal characteristics. Second, it presents lessons learned on how to best manage volcanic events based on a number of crises that have shaped our understanding of volcanic hazards and crises management. Third, it discusses the diverse and wide-ranging aspects of communication involved in crises, which merge old practices and new technologies to accommodate an increasingly challenging and globalised world. The information and insights presented here are essential to tapping established knowledge, moving towards more robust volcanic crises management, and understanding how the volcanic world is perceived from a range of standpoints and contexts around the globe.

Written by experts in the field, the set also explores a variety of extreme events from around the world, including the 2010–2011 Christchurch Earthquakes (New Zealand), the 2017–2018 Thomas Fire (United States), and the 2018 Kerala Floods (India). South Iceland Source Wikipedia, 2013-09 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 27. Chapters: Eyjafjallajökull, 2010 eruptions of Eyjafjallajökull, Air travel disruption after the 2010 Eyjafjallajökull eruption, Consequences of the April 2010 Eyjafjallajökull eruption, ingvellir, Geysir, Landmannalaugar, Fimmvörðuhals, Vestur-Skaftafellssysla, Myrdalsjökull, Oraefajökull, Thorsmork, Lonsoraefi, Tindfjallajökull, Hvannadalshnukur, Torfajökull, Knarraros lighthouse, Haukadalur, jorsa, Markarfljót, Skeioara, Dyrhólaey, Fljótshlí. Excerpt: 2010 eruptions of Eyjafjallajökull were volcanic events at Eyjafjallajökull in Iceland which, although relatively small for volcanic eruptions, caused enormous disruption to air travel across western and northern Europe over an initial period of six days in April 2010. Additional localised disruption continued into May 2010. The eruption was declared officially over in October 2010, when snow on the glacier did not melt. 14-20 April ash covered large areas of northern Europe when volcano erupted. About 20 countries closed their airspace (a condition known as ATC Zero) and it affected hundreds of thousands of travellers. The European flights avoided about 344,109 tonnes of CO₂ emissions per day, while the volcano emitted about 150 000 tonnes of CO₂ per day. Seismic activity started at the end of 2009 and gradually increased in intensity until on 20 March 2010, a small eruption started rated as a 1 on the Volcanic Explosivity Index. Beginning on 14 April 2010, the eruption entered a second phase and created an ash cloud that led to the closure of most of Europe's IFR airspace from

15 until 20 April 2010. Consequently, a very high proportion of flights within, to, and from Europe were cancelled, creating the highest level of air travel disruption since the Second World War. The second phase of the eruption started on 14 April 2010 and resulted in an.

Case Study Japan Airlines Svenja Stellmann, 2010-12-07 Research Paper (undergraduate) from the year 2010 in the subject Business economics - Business Management, Corporate Governance, grade: 1,0, Northumbria University, course: Strategic Management and Leadership, language: English, abstract: Japan Airlines Corporation (JAL) is the leading full-service airline in Asia operating in the domestic and international passenger air-transport industry. However, in 2009 JAL's financial situation is alarming. 2009 was completed by a ¥51bn operating loss, representing a decrease of ¥140bn from previous year. In comparison, JAL's major competitor All Nippon Airways manages to stay in the black. This means JAL's competitive position is clearly in danger. Even worse - if JAL does not find a new strategic option immediately they are in danger of going bankrupt soon. This paper intends to find such a strategic option to guarantee future success of the airline. A thorough strategic analysis including an internal and external analysis is used to find out the key strategic issues. Afterwards three possible strategic options are discussed. The most promising option is put forward and its implementation issues are thoroughly discussed.
