The Business of Resort Management Peter Murphy, 2009-11-04 How can owners and managers ensure that their considerable capital investments will return a competitive return on their investments? How can users and owners be sure they enjoy the promises of tantalizing marketing and real estate claims? *Managing Sustainable Resorts Profitably* combines business management principles with environmental and social concerns to offer development solutions to these questions. By taking an holistic and contemporary approach to the problem of developing sustainable tourism operations, this book provides a comprehensive assessment of the strategies that need to be considered by various governments, developers and, in particular, the customer-investor. The major features of resort development covered by this book include: • Environmental scanning of principal external and internal influential factors • The curse and blessings of seasonality • Competition for people's recreation and retirement dollars • Guest activity programming • Environmental issues • Cruise ships as mobile resorts • Staffing issues in isolated areas • Financial challenges for owners and operators alike • Risk Management • Mutually beneficial options for various stakeholders Based on an analysis of global resort opportunities and trends, the book focuses on those generic features that differentiate regional resort management from urban-centric management needs and priorities. Using comparative case studies the author emphasizes best case/benchmark examples of a range of resorts - large and small, urban and rural - to illustrate what can be achieved.

Staying Small Successfully Frank A. Stasiowski, 2001-08-16 Making smaller A/E/C firms more productive and more profitable Want to do big things with a small company? This no-nonsense guide shows leaders of smaller architecture, engineering, and design firms how to compete successfully against larger organizations without becoming one of them. It demonstrates how a smaller firm can position itself to bring more value to its clients, operate over a larger geographical area, and develop a strategic plan for increasing revenues and profits. Featuring new chapters on forming strategic alliances and maximizing the benefits of information technology, this new edition presents updated case studies of more than fifty small

designfirms. These firms have achieved remarkable success and handled large contracts with limited staff, and the case studies illustrate how they learned to: * Anticipate client needs and meet them in advance * Narrow the target market and expand the client base * Leverage core competencies to create powerful marketing tools * Establish strategic partnerships * Survive and thrive during an economic downturn Read *Staying Small Successfully*, Second Edition and follow its recommendations one step at a time. Your company will stay small, but your business, your revenues, and your profits will soar.

Eco-Resorts Zbigniew Bromberek, 2009-06-04 Eco-Resorts is a design guide for low impact, environmentally friendly tourist resorts in the tropics. The book is the first to offer architects practical, detailed guidance in developing resort buildings that work with a tropical climate and meet the needs and expectations of the client and building inhabitants. The book includes both architectural design and material solutions, supported by theoretical principles, to present a sustainable approach to resort design. It demonstrates that tropical resort buildings do not necessarily require large energy input, in compliance with green building standards. Case studies show how principles of sustainable design have been successfully applied in tropical environments. * Written by an industry insider with practical design experience, knowledge and expertise. * Demonstrates design practices related to site planning and layout, and re-assesses best practices for a tropical environment, allowing architects to apply design principles to their own projects. * Includes international case studies from several countries to illustrate best practice from a variety of tropical climate destinations around the world. Z (Zbigniew) Bromberek, PhD, is an architect educated and registered in Poland, and postgraduate-educated and residing in Australia. Z has been practising and teaching architecture for nearly 30 years. He has been involved and associated with various educational institutions and professional organizations in a number of countries around the world. Before the current appointment as Senior Lecturer in Architecture at the University of Tasmania, Z spent three years as Lecturer in Environmental Design at the University of Queensland, and two years as Guest Professor in Architectural Design in Nanjing, PR China. He was also the President of the Architectural Science Association ANZASCA for three consecutive terms in 2000-05. Z's major research interests include design-environment interaction, low-impact architecture and re-integration of architecture as an expression of a multi-disciplinary approach to design.
