Clinical Applications of Linguistics to Speech-Language Pathology Naomi Gurevich, Christopher Grindrod, 2022-11-09 Clinical Applications of Linguistics to Speech-Language Pathology is a practical guide that provides linguistically grounded approaches to clinical practice. It introduces key linguistic disciplines and discusses how they form a basis for assessment and treatment of individuals with communication differences or disorders. Written by experts in linguistics and communication disorders, each chapter provides clinicians with a foundational understanding of linguistics as it applies to spoken and signed languages and underscores the importance of integrating linguistic theories into clinical decision-making. The book is divided into two parts that focus on the applications of linguistics to speech and language differences and disorders in both children and adults. The chapters cover the full range of linguistic domains including phonetics, phonology, morphology, syntax, semantics, pragmatics, and sociolinguistics. Applications to a wide range of populations including childhood apraxia of speech, aphasia, dysarthria, traumatic brain injury and accent modification clients are also discussed. Many chapters include assessment and treatment resources that can be used by practicing clinicians. This highly accessible and comprehensive book is an indispensable resource for practicing speech-language pathologists and other members of the profession, including instructors with minimal exposure to linguistics. It will also be beneficial for students of Linguistics, Speech and Hearing Sciences, and Audiology and Speech Language Pathology who are seeking practical knowledge of the fields.

Essays on Speech Acts and Other Topics in Pragmatics Marina Sbisà, 2023-05-19 This book collects seventeen essays published between 1984 and 2020, in which Marina Sbisà develops her distinctive approach to speech acts and related pragmatic phenomena. Drawing inspiration from the work of J. L. Austin, the essays examine the categories of speech act theory and apply these categories in the context of natural discourse and conversation, with the aim of providing an accurate analysis of how speech can be action. Sbisà devotes particular attention to normative aspects of language and language use: speech acts reshape the normative context in which they occur by assigning or unassigning deontic properties to relevant parties. Emphasis is placed on the normative aspect of linguistically mandated presuppositions as well as the rational grounds of implicature. The conventionalist view of speech acts developed here turns on the role of intersubjective agreement in deontic updating, in a framework that shifts focus from single utterances to discursive sequences and

conversational interaction. This view challenges the main tenets of a Gricean intentionalist understanding of speech act performance, paving the way for a theory of speech actions centred on the normatively transformative power of illocution. Throughout the essays, examples and applications are given to illustrate how the view put forward contributes to understanding the social and political dimensions of linguistic activity, such as hidden persuasive strategies, power imbalances both within and outside the context of conversation, and the relevance of language and discourse to gender issues.

Assessment in Second Language Pronunciation Okim Kang, April Ginther, 2017-07-14 *Assessment in Second Language Pronunciation* highlights the importance of pronunciation in the assessment of second language speaking proficiency. Leading researchers from around the world cover practical issues as well as theoretical principles, enabling the understanding and application of the theory involved in assessment in pronunciation. Key features of this book include: Examination of key criteria in pronunciation assessment, including intelligibility, comprehensibility and accentedness; Exploration of the impact of World Englishes and English as a Lingua Franca on pronunciation assessment; Evaluation of the validity and reliability of testing, including analysis of scoring methodologies; Discussion of current and future practice in assessing pronunciation via speech recognition technology. *Assessment in Second Language Pronunciation* is vital reading for students studying modules on pronunciation and language testing and assessment.

The Really Useful Literacy Book Tony Martin, Chira Lovat, Glynis Purnell, 2007-12-12 Highly qualified literacy specialists show you how to plan units of work with flexibility and creativity, whilst retaining the objectives of the National Literacy Strategy. A lively, stimulating companion for foundation and Key Stage 1 & 2 teachers.

Advances in Argumentation Theory and Research J. Robert Cox, Charles Arthur Willard, 1982 For this volume the editors commissioned the top theorists in argumentation and human communication to submit essays in their areas of specialization. Because there are sixteen essays contributed by twenty-one specialists, many points of view are represented in this volume; all of the essayists, however, look upon argumentation as a process of human communication, not a species of formal logic. These essayists see the function of argument as a method of attaining social knowledge. The editors have assembled this volume to make available the latest advances in argumentation; for scholars it serves as a state of the discipline report. The editors have divided the book into four sections: Conceptual Foundations, Reasoning and Reasonableness, Methodological Issues, and Uses of Argument. Those contributing under the heading Conceptual Foundations are: Daniel J. O'Keefe, Charles Arthur Willard, Ray D. Dearin, and Henry W. Johnstone, Jr. Contributors to the Reasoning and Reasonableness section are: Ray E. McKerrow, Thomas B. Farrell, Barbara J. O'Keefe, Pamela J. Benoit, Malcolm O. Sillars, and Patricia Ganer. Under Methodological Issues the contributors are: Scott Jacobs, Sally Jackson, V. William Balthrop, and Dale Hample. Contributors to Uses of Argument are: Ch. Perelman, E. Culpepper Clark, Robert P.

Newman, Walter R. Fisher, Richard A. Filloy, and Richard D. Rieke. Reference list prepared by Glenda Rhodes and Jack Rhodes.

Assessing L2 Listening Gary J. Ockey, Elvis Wagner, 2018-08-08 This book is relevant for language testers, listening researchers, and oral proficiency teachers, in that it explores four broad themes related to the assessment of L2 listening ability: the use of authentic, real-world spoken texts; the effects of different speech varieties of listening inputs; the use of audio-visual texts; and assessing listening as part of an interactive speaking/listening construct. Each theme is introduced with a review of the relevant literature, and then is examined through either two or three empirical studies. The notion of authenticity underlies each of these four themes. By creating more authentic test tasks that are similar to real world language tasks, test developers can create listening assessments that not only more effectively assess test takers' communicative competence, but can also have a positive washback effect on educational systems.
