The Perfect Norm Sandra Vavra, Sharon L. Spencer, 2009-02-01 Our goal in writing this book was to validate teachers for strong efforts in their life's work. We often observe teachers' frustrations with what they perceive to be a multitude of different "hot topics" in education that they must attend to now, but which they expect to come and go, like the last "hot topics." So, we wanted to help readers see similarities between many of these "hot topics"—differentiation, multiple intelligences, culturally responsive teaching, "brain-friendly" strategies, authentic assessment, and ethical classroom management—which we feel are not "flashes in the pan." And we trust that serious practitioners will not oversimplify the findings of neuroscientists and their application to education. Reading studies and books by scientists, a number of which are user-friendly, can help ensure that teachers separate the hype from credible information. We have seen this professionally judicious approach in the work of graduate students (Kolinski, 2007) in adopting "brain-friendly" strategies. We have intentionally packed both theoretical/research-based and practical information in this book because professional educators want to know why they should use certain approaches, models, and strategies. In turn, as professionals, we should be able to explain why we teach the way we do—not to justify, but to educate others about our knowledge-based, reflective, decision-making processes and the impact on student learning. Thus, it is important to read Chapter 1 because it lays a foundation. Each succeeding chapter (2-6) has unique and compelling twists and turns—chock full of ideas to use or to adapt. It is possible to gain lots of ideas, processes, and strategies from reading and implementing (or adapting) even one of the unit chapters, or a part of it. While some of the units are explicitly about literacy, others focus on content using reading, writing, speaking, and listening as critical in the learning process. Thus, literacy skills are reinforced and strengthened. Additionally, some of our colleagues and public school partners have given us feedback that they wanted to implement some of the units and activities themselves. So, feel free to use this book for self-exploration and professional development.

The Leader in Me Stephen R. Covey, Sean Covey, Muriel Summers, David K. Hatch, 2025-11-11 From the multimillion-copy bestselling author of *The 7 Habits of Highly Effective People*, Dr. Stephen R. Covey illustrates how his principles of leadership can be applied to children of all ages—updated and revised for modern students. In today's world, we are inundated with information about who to be, what to do, and how to live. But what if there was a way to learn not just what to think about, but how to think? A program that taught young people how to manage priorities, focus on goals, and be a positive influence in their schools? *The Leader in Me* is that program. In this bestseller, Stephen R. Covey took the 7 Habits that have already changed the lives of millions of readers and showed that even young children can use them as they develop. These habits are being adapted by schools around the country in leadership programs, most famously at the A.B. Combs Elementary School in Raleigh. Not only do the programs work, but they work better than anyone could have imagined. This book is full of examples of how the students blossom under the program—from the classroom that decided to form a support

group for one of their classmates who had behavioral problems to the fourth grader who overcame his fear of public speaking and took his class to see him compete in a national storytelling competition. Perfect for individuals and corporations alike, The Leader in Me shows how easy it is to incorporate these skills into daily life so kids of all ages can be more effective, goal-oriented, and successful.

Reviving Don Bosco's Oratory. Salesian Youth Ministry, Leadership and Innovative Project Management Michal Vojtš, 2017-10-30 The book starts with the development of Salesian youth ministry in the post-Vatican II period. The change from a faithful and repetitive education towards a critical and future-centered approach brought multiple risks. Focusing on organizational aspects, we analyze the underlying theories and their anthropological paradigms, especially Management by Objectives. Then we turn back to the original and permanent criterion for any renewal - the experience of Don Bosco in the Valdocco Oratory. His leadership and management qualities, recent leadership concepts, solid bases of the Salesian Youth Ministry and creative experiments are sewn creatively together in an innovative proposal: 1. Creation of an integral anthropological framework; 2. Development of a set of virtues-qualities at the level of action mentality, shared leadership and operative management; 3. Proposal of a transformational project cycle that merges planning, community building and discernment.
