Ken Nielsen

Tony Kushner's Angels in America Ken Nielsen, 2013-08-05 Angels in America paved a new way for American theatre in its combination of heightened theatricality and politics. Tony Kushner has emerged as one of the American theatre's leading playwrights and productions worldwide have meant that the play has been recognized as the most important American play in decades. With the scope of the characters' sexual, class and religious affiliations in the play, Angels in America offers a unique possibility to discuss the construction of American identity in the late 1980s and 1990s. This guide provides a comprehensive critical introduction to the play, giving students an overview of the background and context; detailed analysis of the play including its structure, style and characters; analysis of key production issues and choices; an overview of the performance history from the first performances of Millennium Approaches and Perestroika to recent productions and the 2003 HBO adaptation; and an annotated guide to further reading highlighting key critical approaches.

American Literature and American Identity Patrick Colm Hogan, 2021-11-10 In recent years, cognitive and affective science have become increasingly important for interpretation and explanation in the social sciences and humanities. However, little of this work has addressed American literature, and virtually none has treated national identity formation in influential works since the Civil War. In this book, Hogan develops his earlier cognitive and affective analyses of national identity, further exploring the ways in which such identity is integrated with cross-culturally recurring patterns in story structure. Hogan examines how authors imagined American identity—understood as universal, democratic egalitarianism—in the face of the nation's clear and often brutal inequalities of race, sex, and sexuality, exploring the complex and often ambivalent treatment of American identity in works by Charlotte Perkins Gilman, Eugene O'Neill, Lillian Hellman, Djuna Barnes, Amiri Baraka, Margaret Atwood, N. Scott Momaday, Spike Lee, Leslie Marmon Silko, Tony Kushner, and Heidi Schreck.

American Angels Peter Gardella, 2007 Explores the rich history of angels in America from Spanish colonialism and Puritan culture to modern incarnations found on TV, in movies, in comic books, and on bumper stickers. Finds that Americans have constructed the useful angel as a servant of man rather than an agent of God.

LGBTQ+ and Healthcare in America R. K. Devlin, 2025-01-23 Considers the issues that impact healthcare for LGBTQ+ Americans today and the negative influences that disproportionately affect the well-being of these communities, and presents

a path forward to making needed improvements. The health of LGBTQ+ Americans is affected by many historical achievements and failures, societal influences, economic disparities, cultural shifts, and political divisions that can greatly impact the world of medicine, especially given the COVID-19 pandemic. Each chapter examines these issues to identify the systemic factors and enduring consequences impacting these communities. First-hand accounts from LGBTQ+ individuals impacted by healthcare challenges are included between chapters through In their Words perspective essays. An extensive chronology of relevant people, events, and legislation places this topic in historical context and outlines the evolution of healthcare challenges as they relate to sexuality and gender identity. Intended to be an encompassing reference for high school students, college students, and general readers alike, this overview not only explores the historical and contemporary complexities of this topic, but also proposes solutions for improvement and pathways to advocacy.

Sustainable Development Organisation for Economic Co-operation and Development, 2001-06-28 How can we meet the needs of today without diminishing the capacity of future generations to meet theirs? This is the central question posed by sustainable development. OECD countries committed themselves to sustainable development at the 1992 UN Conference on Environment and Development in Rio, yet - almost ten years later - progress accomplished remains partial and uneven. Drawing on analysis carried forward in response to a mandate from OECD Ministers in 1998, this report stresses the urgency

to address some of the most pressing challenges for sustainable development. It reviews the conceptual foundations of sustainable development, its measurement, and the institutional reforms needed to make it operational. It then discusses how international trade and investment, as well as development co-operation, can contribute to sustainable development on a global basis, and reviews the experience of OECD countries in using market-based, regulatory and technology policies to reach sustainability goals in a cost-effective way. The report also provides an in-depth analysis of policies designed to address key threats to sustainability in the areas of climate change and natural resource management, as well as of those that respond to sustainability concerns at the sectoral and sub-national level. The common thrust of the report is that substantial opportunities exist to make economic growth, environmental protection, and social development mutually reinforcing.

World Stages, Local Audiences Peter Dickinson, 2010-08-15 This book argues that the forms of intimacy and identification that come from being part of the public of a local performance, provide a potential model for rethinking our roles as world citizens. Using his own experience of recent theatrical practice in Vancouver as a starting point, Dickinson maps the spaces of connection and contestation, the flows of sentiment and social responsibility, produced by different communities in response to global sports spectacles. He also analyzes how such topics are taken up in the work of playwrights, conceptual, installation, and performance artists like Ai Weiwei and Rebecca Belmore.
