K. L. Kreig

Black Swan Affair K. L. Kreig, 2016-09 I've loved him as long as I can remember. The gangly boy with big brown eyes and unruly hair who grew up into an intoxicating man. He wears scruff like he invented it and ambles with a swagger that makes panties drop. Killian Shepard. Shep. We grew up together. We played Ghost in the Graveyard. Had our own rock band. It didn't matter that he was five years older than me. It didn't matter that he looked at me as a kid sister even as I grew into woman. It didn't even matter when he left me behind to go to college and start his adult life. He'd be back. He was always meant to be mine. He came back, all right. But instead of smelling of promises, he stunk of betrayal. And he destroyed me-us-the day he married my sister instead of me. So I did the only thing a girl like me in my position could do. I got my revenge. I married his brother, Kael. Now we're one big happy f**king family.

Finance in Asia Qiao Liu, Paul Lejot, Douglas W. Arner, 2013 Asia's demand for second-generation financial institutions and markets needs to be met in order for the region's further development to be sustained. This book provides a compelling, fact-based assessment of current practices and regulations in Asia's financial institutions and markets and carefully documents the exciting opportunities and challenges that lie ahead in the region's financial systems. This book differs in design from typical treatments of financial institutions and markets because its focus is on Asia rather than using the US model (in terms of market configurations or products) as a benchmark, and it takes a contemporary and forward-looking view of financial markets. Examples of practice from Asia are used to illustrate major accepted themes in finance and financial regulation. To the extent that Asia's main economies share characteristics that are distinct, for example, in the relationship between government and the banking sector, or in aspects of corporate governance, the book will discuss the consequences for market operation and intermediation. The book's carefully structured facts and rigorously argued analysis carry important implications both for students in business and law and for professionals new to financial markets in Asia. It will change the way that Asian financial markets and institutions is taught in universities as well as provide a valuable resource for

professionals working in finance in Asia.

The Decline Effect Dean Brooks, 2023-01-31 A crisis is coming for everyone who uses math and science. For decades now, the classical model of probability (the indifference principle and the Gaussian distribution) has been breaking down and revealing its limitations in fields from economics to epidemiology. Now a new approach has revealed the underlying non-classical principle behind all these 'anomalous' laws: — Pareto's law of elite incomes — Zipf's law of word frequencies — Lotka's law of scientific publications — Kleiber's law of metabolic rates — the Clausewitz-Dupuy law of combat friction — Moore's law of computing costs — the Wright-Henderson cost law — Weibull's law of electronics failures — the Flynn Effect in IQ scores — Benford's law of digit frequencies — Farr's law of epidemics — Hubbell's neutral theory of biodiversity — Rogers' law of innovation classes — Wilson's law of island biogeography — Smeed's law of traffic fatalities The general law behind all these particular laws (and countless others) is the decline effect. As a system ages or grows in size, the rules of probability subtly change. Entropy increases, rare items become rarer, and average performance measures decline. The human meaning of a decline may be positive (decreasing costs, falling epidemic mortality) or negative (lower customer loyalty, decreasing efficiency), but the mathematical pattern is always the same. The implications are enormous, as these examples show: All epidemic diseases decline in infectiousness and in lethality. HIV-AIDS went from a highly infectious, 95-percent fatal disease, to a survivable condition with a latency of decades. COVID-19 went from a death rate of 7 percent in early 2020, to under 2 percent in 2022. Hereditary dynasties around the world declined smoothly in lifespan, from hundreds of years to tens of years. When democracies replaced monarchies, the decline (in spans of party control) continued.

Decolonising International Relations Nirmal Jindal, Kamal Kumar, 2025-09-12 This volume critically analyses the theories and concepts of international relations (IR), which will be instrumental in understanding IR from a non-western perspective. Owing to its emphasis on the need to decolonise the discipline of IR, alternate perspectives from the global South have been explored and discussed in detail. The book provides new insights to make the discipline more inclusive, universal and contributory to world peace and security. It lucidly enumerates on the concepts of state, sovereignty, power, conflict, security, diplomacy, human rights, development, market, inequalities, and migration from a non-Eurocentric lens, bringing distinct perspectives and experiences to the fore. Expanding on the Indian foreign policy of Vasudev Kutumbakam, it highlights India's policy of multi-alliances and multilateralism and, also refers to India's contributions during the COVID-19 pandemic and its drive to champion the cause of marginalised nations by reforming international institutions and pressing for development with sustainability. It is testament to India's commitment to global security through cooperation and collective action. This book will be useful to the Departments of Political Science, Global Studies, International Studies, and South Asian studies. It will be an indispensable resource for researchers, social scientists and general readers interested to

understand the theories and key concepts of IR, especially from an Indian perspective.

Fragile Hope Sandhya Fuchs, 2024-06-18 Against the backdrop of the global Black Lives Matter movement, debates around the social impact of hate crime legislation have come to the political fore. In 2019, the UN Commission on Crime Prevention and Criminal Justice urgently asked how legal systems can counter bias and discrimination. In India, a nation with vast socio-cultural diversity, and a complex colonial past, questions about the relationship between law and histories of oppression have become particularly pressing. Recently, India has seen a rise in violence against Dalits (ex-untouchables) and other minorities. Consequently, an emerging Dalit Lives Matter movement has campaigned for the effective implementation of India's only hate crime law: the 1989 Scheduled Castes/Scheduled Tribes Prevention of Atrocities Act (PoA). Drawing on long-term fieldwork with Dalit survivors of caste atrocities, human rights NGOs, police, and judiciary, Sandhya Fuchs unveils how Dalit communities in the state of Rajasthan interpret and mobilize the PoA. Fuchs shows that the PoA has emerged as a project of legal meliorism: the idea that persistent and creative legal labor can gradually improve the oppressive conditions that characterize Dalit lives. Moving beyond statistics and judicial arguments, Fuchs uses the intimate lens of personal narratives to lay bare how legal processes converge and conflict with political and gendered concerns about justice for caste atrocities, creating new controversies, inequalities, and hopes.
