

How Europe Underdeveloped Africa Summary

Walter Rodney

How Europe Underdeveloped Africa Walter Rodney, 2018-11-27 The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping the great divergence between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

Global Perspectives on Victimization Analysis and Prevention Ayodele, Johnson Oluwole, 2019-11-29 Over the past two decades, both developed and developing countries have experienced major individual and collective tragic victimizations leading to major structural and systemic transformations as a consequence of the influence of organized crime and international terrorism. These trends, many of which, as noted earlier, are global in spread and have catastrophic outcomes, revolve around some categories of political diplomacy and unsatisfactory reform responses to spiraling discontent among

motivated youths. *Global Perspectives on Victimization Analysis and Prevention* is an essential research book that provides comprehensive research on postmodern crime prevention and control strategies as well as potential transformations that could be seen in victimology. It offers resources to understand and analyze the main issues, relevant framework, and contextual intricacies within which public safety agendas are articulated and implemented across the globe. Highlighting a wide range of topics such as public safety, crime prevention, and terrorism, this book is essential for criminologists, law enforcement, victim advocates, criminal profilers, crime analysts, academicians, policymakers, researchers, security planners, NGOs, government officials, and students.

Léon Duguit and the Social Obligation Norm of Property Paul Babie, Jessica Viven-Wilksch, 2019-09-07 This book demonstrates the importance of Léon Duguit for property theory in both the civil and common law world. It translates into English for the first time ever Duguit's seminal lecture on property, the sixth of a series given in 1911 in Buenos Aires. It also collects essays from the leading experts on the social function of property in major civil and common law jurisdictions internationally. The book explores the importance that the notion of the social function of property has come to have not only in France but in the entire civil law tradition, and also considers the wide - if un-attributed and seldom regarded - influence in the common law tradition and theory of property.

Structural Transformation as Development Anis Chowdhury, Zulfan Tadjoeuddin, Yogi Vidyattama, 2025-01-21 This book evaluates development progress using the lens of structural transformation in four groups of developing countries: Africa's least developed countries (LDCs), Asia's LDCs, landlocked Central Asian countries, and Pacific small island states. The analysis presented is contextualized in the diverse economic characteristics and geopolitical landscape of the four categories of countries. It emphasises critical binding factors unique for each category. Therefore, the chapter on Africa's LDCs emphasises their path dependence determined by colonial exploitation and maintained through neo-colonial arrangements. The chapter on Asia's LDCs highlights their democratic deficits and influences of geopolitical rivalries among global and regional powers. The chapter on landlocked Central Asian countries focuses more on the unique transition experience of those countries coming out from USSR hinterlands to independent states in the wake of the third wave of democratisation in the 1990s. Lastly the evaluation of Pacific small island states is very much influenced by the fate of geography for being small in size and remotely located. The diverse coverage offers readers rich political economy explanations of varied, but largely poor, structural transformation experiences. The book is nontechnical, with descriptive, narrative, and analytical approaches on comparative development, making it suitable and accessible for non-specialist audiences.

Moral Philosophy and Development Teodros Kiros, 1992 Although development issues generally have been considered in a framework of economic theory and politics, in this volume Tedros Kiros looks to European ideas of moral philosophy to explain the underdevelopment of Africa and the persistent African food crisis. He draws upon the works of Adam Smith, David Ricardo, Karl Marx and the concepts of hegemony and counter-hegemony. Kiros points out that Africans and Europeans held opposing worldviews upon their initial contact and agrees with those who explain the present condition in Africa partly as the result of European colonialism. In his concluding chapter he develops principles of moral philosophy to guide Africans and others in the future economic development of the African continent.
