La universidad en Iberoamérica. Estudios históricos José María Hernández Díaz, 2022-06-01 La Universidad en Iberoamérica se compone de un elenco de seis estudios centrados en el análisis de la historia de la universidad en Iberoamérica desde sus inicios en el siglo XVI hasta el presente. La universidad ha nacido en la Europa medieval y tiene su bautismo intercontinental fuera de sus fronteras iniciales en la América colonial de la mano del modelo español de consolidación de la conquista, de la religión, la lengua y el modelo de organización propia de un gran imperio. Además de las aportaciones a la historiografía universitaria de la época Moderna, en este libro se incluyen otras centradas en lo específico de la universidad española contemporánea, de la excepción que representa el caso de Brasil, la incursión en el campo de la arquitectura de la educación superior, así como la singular posición que ocupa la Universidad de Salamanca en todo el proceso histórico de relaciones universitarias con Iberoamérica hasta nuestros días. Las firmas que sostienen los trabajos que conforman el libro dan una solidez sin fisuras a esta aportación original y diferenciada a la historia de las universidades.

Introducción a la historia teórica José Carlos Bermejo Barrera, 2009-10-30 La historia teórica es una herramienta crítica al servicio de los historiadores, no para estudiar el pasado sino para analizar las posibilidades y los límites del

conocimiento histórico. La historia ha delegado siempre en la filosofía el necesario estudio de conceptos, métodos y sentido del conocimiento histórico. Bermejo Barrera propone, en cambio, la creación de un espacio híbrido, entre historia y filosofía, desde el que pueda reflexionarse sobre la historia, a partir del conocimiento del funcionamiento del trabajo de los historiadores, un conocimiento del que a menudo carecen los filósofos.
