Ingredient Interactions Anilkumar G. Gaonkar,1995-06-05 This work examines how major food ingredients such as water, salt, hydrocolloids, starches, lipids, proteins, flavours and additives interact with other constituents of food and affect food quality with respect to microstructure, texture, flavour and appearance. The intention is to provide new opportunities for food product development. It considers both real foods and model food systems.

Ayurvedic Herbs M.S. Premila,2012-10-12 A single-source reference on the most important and best-investigated Ayurvedic herbs This book examines the clinical information available on more than 60 Ayurvedic herbs to determine how their use in traditional Indian medicine is supported by modern scientific study. Plants are grouped according to body systems and each entry includes a description, information on the source plant, distribution and traditional use, active chemical constituents, relevant pharmacology, and details of clinical studies and safety findings. This unique book also includes a brief history of Ayurveda, examines the history of drug development and evaluation in ancient India, and identifies current trends resulting from scientific investigation. Worldwide interest in Ayurveda is growing quickly, especially in the United States, Europe, and Japan. But until now, information on Western-style clinical trials on Ayurveda herbs has been scattered and no single source for descriptions, comments, and references has existed. Ayurvedic Herbs presents the first critical validation of Ayurvedic medicine, extensively referenced for physicians and clinicians interested in alternative and adjunctive therapies. This unique book is essential for making informed choices on herb use, offering clinical trial data, results of pharmacological studies, and safety information. Ayurvedic Herbs examines: gastrointestinal agents hepatoprotective agents respiratory tract agents cardiovascular drugs urinary tract drugs antirheumatic agents skin and trauma care agents gynecological agents antidiabetic agents CNS agents rasayana drugs dental and ophthalmological agents and much more Ayurvedic Herbs includes cross-references to chapters when a particular plant has more than one indication and watercolor illustrations of twelve major herbs.

Advanced Dairy Chemistry Volume 2: Lipids Patrick F. Fox,Paul L. H. McSweeney,2007-04-25 The Advanced Dairy Chemistry series was first published in four volumes in the 1980s (under the title Developments in Dairy Chemistry) and

revised in three volumes in the 1990s. The series is the leading reference on dairy chemistry, providing in-depth coverage of milk proteins, lipids, lactose, water and minor constituents. Advanced Dairy Chemistry Volume 2: Lipids, Third Edition, is unique in the literature on milk lipids, a broad field that encompasses a diverse range of topics, including synthesis of fatty acids and acylglycerols, compounds associated with the milk fat fraction, analytical aspects, behavior of lipids during processing and their effect on product characteristics, product defects arising from lipolysis and oxidation of lipids, as well as nutritional significance of milk lipids. Most topics included in the second edition are retained in the current edition, which has been updated and considerably expanded. New chapters cover the following subjects: Biosynthesis and nutritional significance of conjugated linoleic acid, which has assumed major significance during the past decade; Formation and biological significance of oxysterols; The milk fat globule membrane as a source of nutritionally and technologically significant products; Physical, chemical and enzymatic modification of milk fat; Significance of fat in dairy products: creams, cheese, ice cream, milk powders and infant formulae; Analytical methods: chromatographic, spectroscopic, ultrasound and physical methods. This authoritative work summarizes current knowledge on milk lipids and suggests areas for further work. It will be very valuable to dairy scientists, chemists and others working in dairy research or in the dairy industry.
