The Journey To Becoming Fearless: A Story of Hope, Courage and Strength Emelyne Carmen Ho,2018-07-08 “Nauseous and queasy, my blood ran cold. I could no longer hold it back. As I further broke down in a cold sweat, tears uncontrollably rolled down my face. All I knew was pain. It didn’t stop coming; it never did anyway. Grappling with the suffocating and tormenting screams deep inside was exhausting enough. I didn’t need any more. I closed my eyes. I could no longer see a future. I saw the end. That was when I knew what Fear really was. “ For the past 18 years of her life, Emelyne had been facing multiple horrific medical diagnoses that kept surging at her one after another, nonstop. Fear, has weighed her treacherous life journey down even more over the years, forcing her to put up countless bone-crushing fights against it. As she embarks on a new journey to becoming Fearless, she continues to be struck with numerous unforgiving tragedies and tribulations that unabatingly haul her deeper into the abyss of misery, sorrow and despondency. The Journey To Becoming Fearless: A Story of Hope, Courage & Strength not only unveils to us her bravery and fortitude as she steps foot into this new

journey, but also her gradual discovery of the genuine meaning of acceptance, embracement and hope.

Access to Higher Education Graeme Atherton, 2017-09-16 This book is the first systematic attempt to examine one of the biggest challenges facing universities and society in the 21st century: how do we create opportunities to allow people from all social backgrounds to benefit from higher education? It examines how policymakers, higher education institutions and civil society organisations are meeting this challenge across the globe. Each chapter focuses on one of 12 countries, including the economically powerful US and Germany, developing nations from Africa and South America and the new higher education 'superpowers' of China and India. Access to Higher Education shows that across these different nations inequalities in higher education participation are common, but their nature differs. It argues for a new, 'nationhood' based approach to understanding why these differences exist.

EBOOK: From Vocational to Higher Education: An International Perspective Gavin Moodie, 2008-10-16 This book discusses current issues in vocational and higher education and the relations between them. As well as concentrating on the well developed English-speaking countries - the UK, US, Canada, Australia and New Zealand - the book also considers important developments in continental Europe: in particular: The Bologna process in higher education The Copenhagen declaration on enhanced European co-operation in vocational education and training The development of a European qualifications framework From Vocational to Higher Education is key reading for university lecturers, those studying for higher degrees in higher education, managers and policy makers.

Challenging Boundaries Neil Garrod, Bruce Macfarlane, 2009-01-13 This edited volume will be an important and key resource for managers, researchers, and policy makers in the field of Higher Education and Further Education. It offers insights into a radical new way of organizing post-compulsory education on an international basis that directly promotes a social justice agenda (i.e., widening of student participation). Around the world post-compulsory education is divided between Universities and Community-based Colleges. Universities are typically concerned with higher education, while community based colleges focus on further and technical education. In response to a range of social and economic forces there has been a growth in the number of dual sector institutions (or duals) that span this divide. Challenging Boundaries brings together leading international thinkers, policy analysts, academic managers, and researchers who question whether duals can provide relevant education to students and appropriate graduates for the economy, while also offering greater opportunities to disadvantaged students. Challenging Boundaries provides an analysis of the potential of dual sector institutions in North America, UK, South Africa, and Australasia. This volume draws on the very latest research findings and effectively looks to: Challenge conventional thinking about post-compulsory education Demonstrate how a number of institutions internationally are addressing the organizational, managerial, and cultural challenges of operating as dual sector universities Combine the latest research in the field from a range of international scholars with operational insights from

university leaders Provide a key resource for education policy makers and researchers and students of educational policy and management at masters and doctoral level
