Gerry Crispin, Mark Mehler

Poland's EU Accession Sergiusz Trzeciak, 2018-01-12 This book examines the process of Poland's accession negotiations to the European Union between 1998-2003. An empirical study based on Robert Putnam's two-level game model, it charts the influence and role of key domestic actors and groups on the negotiations especially in three critical, controversial, areas - areas where EU accession threatened to bring about a profound transformation to Polish life - agriculture, with particular emphasis on direct payments and production quotas; the purchase of real estate by foreigners; and the free movement of labour. This book demonstrates the complex interaction between the domestic and international level of negotiations and furthermore, shows how critical this link can be to negotiation outcomes at the international level. It reveals how susceptible Poland's negotiation process was to domestic pressure, particularly public opinion and interest groups. Drawing heavily on qualitative analysis - such as press releases, news wires, policy documents, as well as quantitative analyses, such as the use of opinion polls, and supported by in-depth, unrestricted interviews with key Polish decision-makers, this book examines the dynamics of policy formation in Poland and shows how this translated into the final conditions of accession.

Regulating the Web Zachary Stiegler, 2013 Since its popularization in the mid 1990s, the Internet has impacted nearly every aspect of our cultural and personal lives. Over the course of two decades, the Internet remained an unregulated medium whose characteristic openness allowed numerous applications, services, and websites to flourish. By 2005, Internet Service Providers began to explore alternative methods of network management that would permit them to discriminate the quality and speed of access to online content as they saw fit. In response, the Federal Communications Commission sought to enshrine "net neutrality" in regulatory policy as a means of preserving the Internet's open, nondiscriminatory characteristics. Although the FCC established a net neutrality policy in 2010, debate continues as to who ultimately should have authority to shape and maintain the Internet's structure. *Regulating the Web* brings together a diverse collection of scholars who examine the net neutrality policy and surrounding debates from a variety of perspectives. In doing so, the book contributes to the ongoing discourse about net neutrality in the hopes that we may continue to work toward preserving a truly open Internet structure in the United States.

Breakthrough 2.0: Singaporeans Push For Parliamentary Democracy Derek Da Cunha, 2022-01-07 Some six decades of

socialisation by the ruling People's Action Party (PAP) has ingrained in a majority of Singaporeans the instinct that it is not unusual to give up certain personal liberties for the greater good as long as the PAP State ensures the material well-being of Singaporeans. The general election of 2020 (GE2020) during the COVID-19 pandemic, put this social compact between the people and the State to the test. Significant job losses, wage cuts, and an erosion of personal wealth — due to measures to counter the pandemic — cut substantially into the PAP popular vote nationally, and resulted in an unprecedented 10 candidates from the opposition Workers' Party (WP) being elected to Parliament. GE2020 confirmed the trend from GE2011, when the WP first made a breakthrough, that Singaporeans will only accept a party in moderate opposition to the PAP. This narrative differs markedly from conventional wisdom. Breakthrough 2.0 explores the aforementioned phenomena. The book analyses critically the issues surrounding parliamentary elections in Singapore. It also focuses on issues not explored by many other observers, namely voter psychology; election processes; and, party branding. A comparative analysis of election practices and processes in other jurisdictions is also employed to determine where parallels can or cannot be drawn with the situation in Singapore. The author has had direct access to personalities across the political parties. Consequently, he utilises primary sources, supported by evidence, in sketching out backstories to events which exposes certain myths that were prevailing in social media in the months running up to GE2020.

Push Guide to Which University Johnny Rich, 2005-05 This popular guide has been fully updated and redesigned to reflect exactly what today's students want to know. It is the most accessible guide to higher education and student life in the UK and provides reliable, lively and unbiased information on what universities really offer. The establishments are listed alphabetically, with each entry providing a wealth of information, from a description of the campuses to famous alumni. A separate section supplies a list of courses and which universities offer them, making it easy for the reader to cross-reference their chosen course with the right university.

Searcher, 1997

Rebooting a Nation Joel Burke, 2025-04-03 How did a small post-Soviet state become a digital and e-government powerhouse, producing world-leading tech companies and pioneering policies for remote residency? Three decades after gaining independence from the Soviet Union, Estonia is a nation transformed. Today, the country is known worldwide as a startup hub, boasting billion-dollar companies including Wise, Veriff and Bolt—but even more impressive are Tallinn's pioneering efforts in e-government. With 99 per cent of government services digitalised and accessible online, citizens can vote via computer, or file their taxes online in minutes; and Estonia's use of artificial intelligence to enhance and automate its offering to citizens long predates ChatGPT. Drawing on his experience as a former official for the Republic of Estonia, Joel Burke offers unique insight into the country's rapid rise as a tech and e-government powerhouse since the turn of the century. From the founding of Skype to the future of the e-state, he unveils the tactics and stories behind Estonia's

spectacular journey—after years of Soviet occupation and mismanagement to global tech leadership. For those hoping to learn from Estonia’s incredible journey, Burke offers insights into the government’s use of AI, its creation of a digital society, and its cultivation of a culture driving public-sector creativity and innovation. Rebooting a Nation is an informative and entertaining masterclass in Estonia’s modern history.
