The Pastor's Bookshelf Austin Carty, 2022-04-05 Preaching Magazine Book of the Year (2022) Hearts & Minds Best Books List (2022) Christianity Today Award of Merit in Church & Pastoral Leadership (2023) It's time to give pastors permission to read books besides the Bible. Six months into his first senior pastorate, Austin Carty sat in his office reading—not the Bible, not a commentary, not a theological tract, but a novel by Fyodor Dostoevsky. As the minutes turned to hours, while he sat engrossed in this book, he noticed something: he began feeling uneasy. And then anxious. And then guilty. What would someone think if they opened the door and caught him reading fiction? For busy pastors (is there any other kind?), time spent reading feels hard to justify, especially when it's not for sermon prep. But what if reading felt less like a luxury and more like a vocational responsibility—a spiritual practice that bears fruit in every aspect of ministry, from preaching to pastoral care to church leadership? Austin Carty believes that this is exactly how pastors ought to think about reading. The Pastor's Bookshelf shows how worthwhile reading is more about formation than information and how, through reading, a pastor becomes a fuller, more enriched human being with a deeper capacity for wisdom and love, better equipped to understand and work for God's kingdom.

The Natural Laws of Plot Yoon Sun Lee, 2022-10-11 Is plot a line, an arc, or a shape? None of these. Rather than thinking of plot as a sequence of events or actions put into place solely through human agency against the backdrop of setting, this book questions why we should distinguish between plot and setting—and indeed, whether we can make such a distinction. After all, plot, Yoon Sun Lee contends, cannot be disentangled from the material setting in which it takes place. In *The Natural Laws of Plot*, Lee connects the history of the novel and the history of science to show how plot in the realist novel is given shape by the characteristics of the physical world—and how in turn, plot serves as the avenue through which the realist novel participates in the same lines of inquiry about the world as pursued by the natural and physical sciences. Lee argues that the novel emerges and evolves in tandem with the development of scientific practices and concepts in eighteenth- and nineteenth-century Europe to investigate the idea of a unified and objective world. Drawing on readings from Defoe, Austen, Scott, and many others, Lee demonstrates how bodies, human and non-human, behave according to laws that are built into

worlds by plot, and how they are subject to causes and consequences that can occur independently of individual action, social forces, or metaphysical destiny. This interest in representing and exploring how things happen sets the novel apart from other literary genres, and makes the history of science integral to the understanding of the history and theory of the novel, and of narrative. Plot, Lee shows us, is immersive and powerful, because it satisfies our wish to know how things happen in a coherent, objective, and possibly real world.
