The Sky on Fire Jenn Lyons, 2024-07-09 Enter a world ruled by dragons... *The Sky on Fire* is a daring new fantasy heist adventure that will thrill fans of *Temeraire*, *Fourth Wing*, and *Dragonriders of Pern*. Anahrod lives only for survival, forging her own way through the harsh jungles of the Deep with her titan drake by her side. Even when an adventuring party saves her from capture by a local warlord, she is eager to return to her solitary life. But this is no ordinary rescue. It's Anahrod's past catching up with her. These cunning misfits—and their frustratingly appealing dragonrider ringleader—intend to spirit her away to the dragon-ruled sky cities, where they need her help to steal from a dragon's hoard. There's only one problem: the hoard in question belongs to the current regent, Neveranimas—and she wants Anahrod dead. From Jenn Lyons, the acclaimed author of the *Chorus of Dragons* series, this soaring standalone fantasy combines conniving dragons, lightning banter, high-stakes intrigue, and a little bit of heat. The Casual Sky Observer's Guide Rony De Laet, 2011-10-12 *The Casual Sky Observer's Pocket Guide* offers an observing program for occasional amateur observers looking for some quick, fun astronomy adventures under the stars. In the real world, where time for observing is limited, the weather is seldom perfect, and expensive equipment is not an option, amateur astronomy may not be seen as a worthwhile activity. However, portable and quick-to-set-up instruments are available. A pair of binoculars or a small telescope fills the bill. And the way to make the most of these instruments is described in the *Casual Sky Observer's Pocket Guide*. Not only does the book feature the best and brightest showpieces of the heavens; it also provides a great deal of physical and environmental data as well as lots of fascinating information and beautiful illustrations that provide a unique perspective on the many treasures within and beyond our home galaxy, the Milky Way--stars, star clusters, other galaxies, and nebulae, all within reach of binoculars or a small telescope.

The Girl the Sea Gave Back Adrienne Young, 2019-09-03 From Adrienne Young, New York Times bestselling author of *Sky in the Deep*, comes her new gut-wrenching epic *The Girl the Sea Gave Back*. For as long as she can remember, Tova has lived among the Svell, the people who found her washed ashore as a child and use her for her gift as a Truthtongue. Her own home and clan are long-faded memories, but the sacred symbols and staves inked over every inch of her skin mark her as one who can cast the rune stones and see into the future. She has found a fragile place among those who fear her, but when two clans to the east bury their age-old blood feud and join together as one, her world is dangerously close to collapse. For the first

time in generations, the leaders of the Svell are divided. Should they maintain peace or go to war with the allied clans to protect their newfound power? And when their chieftain looks to Tova to cast the stones, she sets into motion a series of events that will not only change the landscape of the mainland forever but will give her something she believed she could never have again—a home.

William Herschel Discoverer of the Deep Sky Wolfgang Steinicke, 2021-11-16 The book describes the observational work of William and Caroline Herschel. It focuses on deep-sky objects, observed 1774-1817. Most were discovered by William in the monumental sweep campaign (1783-1802), assisted by his talented sister. 2500 objects were published in three catalogues. The study of the sky from southern England also concerned double stars and the Solar System, yielding the Uranus discovery in 1781. But William Herschel was much more than a mere observer. He built large reflectors, developed new methods and thought about the nature and evolution of cosmic objects and the structure of the Milky Way. He was an extremely influential astronomer and had a worthy successor, his son John.

Field Guide to the Deep Sky Objects Mike Inglis, 2013-03-09 Field Guide to the Deep Sky Objects is a uniquely usable guide for observers. Following detailed descriptive summaries of each class of object, it includes extensive lists of deep-sky targets which are classified according to type of object: - Stars (bright, coloured, double, triple, quad, multiple); - The spectral sequence; - Clusters; - Globular clusters; - Stellar associations; - Stellar streams; - Nebulae (emission, dark, reflection, planetary); - Supernovae remnants; - Galaxies (spiral, elliptical, irregular). Each of these groups is organised by month of best visibility, and within that by ease of observing. Simply, this means that you can choose a class of object, and for any month of the year find an observing list that begins with easiest through to progressively more difficult targets! Amateur astronomers of all levels of ability will find this book invaluable for its broad-ranging background material, its lists of fascinating objects, and for its application as graded exercises to improve practical observing skills while viewing many different types of deep-sky object.
