Dynamics of L2 Sociolinguistic Development in Adulthood Mason A. Wirtz, 2025-04-17 This book constitutes a holistic study of sociolinguistic development among adult second language (L2) learners in a naturalistic setting. Combining results from a cross-sectional and longitudinal micro-development study, it examines the acquisition of both the productive and interpretive skills necessary to engage with the contextually sensitive use of vernacularity in Austria. The studies focus on issues of inter- and intra-individual variation and aim to shed much-needed light on why L2 learners acquire sociolinguistic variation, which aspects of it they acquire, which factors influence it and when they acquire it. Drawing on methodological and theoretical frameworks from diverse fields such as developmental and cognitive psychology, psycho- and sociolinguistics, as well as second language acquisition, the book connects topics rarely found in the same empirical piece, including the role of cognitive functioning and socioaffective factors, the temporal specificity of L2 sociolinguistic development in production and perception, and the issue of group-to-individual generalizability. The studies showcased in this work provide ample evidence that late starters of a L2 in early adulthood and midlife can acquire the skills necessary to successfully navigate the complex sociolinguistic variation within the target-language community, but the process is certainly not one without hurdles.

Sociolinguistics of Style and Social Class in Contemporary Athens Irene Theodoropoulou,2014-09-15 This ethnographic study deals with the ways people in Athens, Greece, use style to construct their social class identities. Including a rich dataset comprising ethnographic interviews with actual people who live in the stereotypically seen as leafy and posh northern suburbs and in the stereotypically treated as working class western suburbs of Athens coupled with data from popular literary novels, TV series and Greek hip hop music, it argues that the relationship between style and social class identity is mediated by complex social meanings encompassing features from and discourses relevant to both areas, which are structured across different orders of indexicality depending on the genre of speech in which they are created. As such, it will be of interest to scholars in sociolinguistics, discourse analysis, anthropology, sociology, Modern Greek studies, and to everyone who is interested in how social class is constructed via language.

Style Nikolas Coupland,2007-08-09 Style refers to ways of speaking - how speakers use the resource of language variation to make meaning in social encounters. This 2007 book develops a coherent theoretical approach to style in sociolinguistics, illustrated with copious examples. It explains how speakers project different social identities and create different social relationships through their style choices, and how speech-style and social context inter-relate. Style therefore refers to the wide range of strategic actions and performances that speakers engage in, to construct themselves and their social lives. Coupland draws on and integrates a wide variety of contemporary sociolinguistic research as well as his own extensive research in this field. The emphasis is on how social meanings are made locally, in specific relationships, genres, groups and cultures, and on studying language variation as part of the analysis of spoken discourse.
