Les transmissions ciblées au service de la qualité des soins Florence Dancausse, Élisabeth Chaumat, 2011-05-27 Les transmissions ciblées sont une méthode-clé pour organiser la partie narrative du dossier de soins et aller dans le sens de soins de meilleure qualité, en structurant et simplifiant les transmissions. Elles permettent aux soignants de se centrer sur la personne malade plutôt que sur la maladie, d'éviter des retranscriptions répétitives (et donc des erreurs), de gagner du temps, de faciliter et d'améliorer l'organisation des soins comme la prise en charge interdisciplinaire lors des relèves cliniques. Elles offrent la possibilité de faire des synthèses sur l'évolution du patient dans les circonstances de relais tel qu'un déménagement sécurisé, ou encore de concertation interdisciplinaire lors du dispositif d'annonce de cancer en oncologie. Cet ouvrage didactique, illustré par de nombreux documents, des exercices, ainsi qu'un ensemble d'outils pour une évaluation rapide et qualitative des transmissions ciblées, offre un plan clair : - Méthodologie d'utilisation des transmissions ciblées à l'écrit et à l'oral. - Stratégie d'implantation des transmissions ciblées. - Les implications au niveau de la qualité des soins de ce choix stratégique. - Le concours des transmissions ciblées à l'évaluation des pratiques professionnelles. - Le dossier patient informatisé. Tous les exemples relatés sont issus de l'utilisation des transmissions ciblées par les soignants de différents établissements de santé en France. Ils rendent compte aussi bien de l'évolution de cette méthode que de son

application dans tous les services de soins et dans les instituts de formation dans le contexte actuel d'organisation en pôle d'activité. La troisième édition de cet ouvrage propose une ouverture sur l'intérêt que représentent les transmissions ciblées dans l'évaluation des pratiques professionnelles soignantes. Un nouveau chapitre est consacré au lien entre le raisonnement clinique conduit dans les transmissions ciblées et la qualité des pratiques professionnelles. A travers l'étude d'une situation concrète, le plan d'amélioration de la qualité de la pratique analysée fait une place prépondérante au leadership clinique des cadres et coordinateurs des soins, ressource indispensable à la mise en œuvre des chemins cliniques abordés dans cet ouvrage. Les transmissions ciblées sont une méthode-clé pour organiser la partie narrative du dossier de soins et aller dans le sens de soins de meilleure qualité, en structurant et simplifiant les transmissions. La troisième édition de cet ouvrage propose une ouverture sur l'intérêt que représentent les transmissions ciblées dans l'évaluation des pratiques professionnelles soignantes.

Du design aux résultats Abdourahamane dit Baffa Keïta, 2025-01-30 Ce livre présente une méthodologie détaillée pour l'analyse de la performance et de la mise en place des systèmes de Suivi-Évaluation, Redevabilité et Apprentissage (SÉRA) au sein des organisations et des projets. Face aux lacunes observées dans les systèmes traditionnels de suivi-évaluation, cet ouvrage vise à optimiser la conception et le fonctionnement des systèmes SÉRA. Les systèmes SÉRA rencontrent souvent des défis dans la mesure des progrès et des résultats, ce qui peut nuire à l'apprentissage et à l'amélioration continue. Ce livre propose donc une approche innovante et structurée, basée sur un diagnostic concret. Il introduit un nouveau cadre basé sur le concept des sept Ps (7Ps) et quatre composantes clés essentielles à la mise en place efficace des systèmes SÉRA, favorisant ainsi le succès des organisations ainsi que les projets/programmes. Découvrez comment cette approche intégrée peut transformer votre organisation et optimiser les résultats de vos interventions.
