The Great Pain Deception Steve Ozanich, 2020-04-28 The Great Pain Deception takes us on a compelling expedition into the late Dr. John Sarno's seminal work on TMS, The Mindbody Syndrome. Dr. Sarno has stated that Steve Ozanich humanized my work. It has been successful in helping many thousands of people to heal from various health disorders, including chronic pain and disease. Describing in detail, Steve walks us through his life of chronic pain to freedom after his discovering of TMS. He then delves deeper into the causes and effects of both pain and disease, synthesizing a new paradigm in understanding our health and healing. TMS is the missing link that has been steadfastly searched for in healing. However, it remains controversial just as all new truths that come to be. Healing from most chronic pain and many other health disorders does not require surgery, drugs, or any medical modality, only a deeper understanding. The Great Pain Deception researches the psychology behind suffering, including memetics, social contagion, placebos, and why the medical industry, along with some sufferers, reject the healing solutions. The medical industry by-and-large treats symptoms, which is a failed model in healing. We currently possess the most advanced techniques for healing back pain in the history of humankind, yet back pain has risen to become the #1 cause of disability in the world. The back pain problem has gotten worse, not better, because the industry has focused on treating pain and not on its cause. True healing occurs when the cause of pain and disease is dissolved, not by treating the structure and symptoms of the physical body. Eliminate the cause and you eliminate the suffering. The successes of The Great Pain Deception and TMS are growing and can be found online and on YouTube and inside its many pages. Success is measured in the healings themselves. This book describes the deeper understanding necessary to be well again, and more.

A Cycle of the West John Gneisenau Neihardt, 2018-08-01 A Cycle of the West rewards its readers with a sweeping saga of the American West and John G. Neihardt's exhilarating vision of frontier history. It is infused with wonder, nostalgia, and a keen appreciation of epic history. Unquestionably the masterpiece of the poet who has been called the American Homer, A Cycle of the West celebrates the land and legends of the Old West in five narrative poems: The Song of Three Friends (1919), The Song of Hugh Glass (1915), The Song of Jed Smith (1941), The Song of the Indian Wars (1925), and The Song of the Messiah (1935). This unforgettable epic of discovery, conquest, courage, and tragedy speaks movingly and resoundingly of a unique American experience. The new introduction by former Texas poet laureate Alan Birkelbach and annotations by Joe

Green present fresh views of Neihardt's iconic work.

All Creation Groans Daniel W. O'Neill, Beth Snodderly, 2021-05-18 In a suffering world reeling from global pandemics and health disparities, it is high time to think theologically about the devastating experience of disease, and to address our God-inspired responsibility to understand its origins and engage in its management. In a fragmented world, we need a unifying and integrated perspective on people in communities embedded in a fractured ecology. In an academic world blind to the spiritual world and imbalanced toward technical solutions, the global church must articulate a contemporary metanarrative that is moral, practical, and deeply transformational. All Creation Groans brings together multiple perspectives for a compelling global-health approach to the pathologies of the world as a part of the missio Dei. The authors paint a unifying perspective on God's healing intentions in creation, redemption, and consummation, and the opposing nature-corrupting effects of the rebellion of created moral agents. It is a fresh call for the global church to engage in aligning with God's healing action for eternally sustainable global health.

The Ironic Spectator Lilie Chouliaraki, 2013-08-26 WINNER of the 2015 ICA Outstanding Book Award This path-breaking book explores how solidarity towards vulnerable others is performed in our media environment. It argues that stories where famine is described through our own experience of dieting or where solidarity with Africa translates into wearing a cool armband tell us about much more than the cause that they attempt to communicate. They tell us something about the ways in which we imagine the world outside ourselves. By showing historical change in Amnesty International and

Oxfam appeals, in the Live Aid and Live 8 concerts, in the advocacy of Audrey Hepburn and Angelina Jolie as well as in earthquake news on the BBC, this far-reaching book shows how solidarity has today come to be not about conviction but choice, not vision but lifestyle, not others but ourselves – turning us into the ironic spectators of other people's suffering.

Virtue Ethics for the Real World Howard J. Curzer,2023-02-10 In Virtue Ethics for the Real World: Improving Character without Idealization, Howard J. Curzer argues that character ideals seduce virtue ethicists into counterintuitive claims, mislead and psychologically harm people seeking to improve their characters, and sometimes become tools for exploitation. Curzer offers a theory of Aristotelian virtue ethics that eschews idealization and that harmonizes with common sense. To explain the many dilemmas of ordinary life, he allows that different virtues sometimes enjoin incompatible actions and even enjoin actions that conflict with duty. Curzer defends the doctrine of the mean, arguing that idealized traits such as unilateral forgiveness, universal civility, unconditional commitments, and unlimited generosity are not virtues. He shows that the reciprocity of virtues doctrine depends upon idealization and rejects it. When undergirding his theory, Curzer wears several hats. He is a eudaimonist when grounding virtue, a constructivist when grounding value, and a perspectivist (a la Nietzsche) when grounding virtuous action. How can people improve without aiming at an ideal? Curzer offers an individualized approach to character improvement modeled on contemporary medicine. First, diagnose each person's character flaws. Then tailor treatment plans to each flaw. An important tool is a fine-grained table of the components of character, their failure modes, and corresponding therapies. Curzer provides the beginnings of such a table.
