Explainer-in-Chief David Macaulay updates his worldwide bestseller to capture the latest developments in the technology that most impacts our lives. What possible link could there be between parking meters and meat grinders, jumbo jets and jackhammers, remote control and rockets, electric guitars and egg beaters? Macaulay explains them all! Famously packed with information on the inner workings of everything from windmills to Wi-Fi, this extraordinary and humorous book both guides readers through the fundamental principles of machines and shows how the developments of the past are building blocks of the world of tomorrow. This sweepingly revised edition embraces recent technological developments, from touchscreens to 3D printers. Each scientific principle is brilliantly explained, with the help of a charming, if rather slow-witted, woolly mammoth. Literature-Based Teaching in the Content Areas Carole Cox, 2011-01-12 Grounded in theory and best-practices research, this practical text provides teachers with 40 strategies for using fiction and non-fiction trade books to teach in five key content areas: language arts and reading, social studies, mathematics, science, and the arts. Each strategy provides everything a teacher needs to get started: a classroom example that models the strategy, a research-based rationale, relevant content standards, suggested books, reader-response questions and prompts, assessment ideas, examples of how to adapt the strategy for different grade levels (K-2, 3-5, and 6-8), and ideas for differentiating instruction for English language learners and struggling students. Throughout the book, student work samples and classroom vignettes bring the content to life.

Talking Books James Carter, 2013-01-11 Talking Books sets out to show how some of the leading children's authors of the day respond to these and other similar questions. The authors featured are Neil Ardley, Ian Beck, Helen Cresswell, Gillian Cross, Terry Deary, Berlie Doherty, Alan Durant, Brian Moses, Philip Pullman, Celia Rees, Norman Silver, Jacqueline Wilson, and Benjamin Zephaniah. They discuss with great enthusiasm: *their childhood reading habits *how they came to be published *how they write on a daily basis *how a particular book came together *a type of writing that they are especially known for. Through in-depth interviews, they each reveal their approach to their craft. Much is known and spoken of the product that is the children's book, but it is rare that writers are given the opportunity to talk at length about the process of writing for children. Talking Books redresses the balance by presenting a wide selection of authors (of fiction, non-fiction and poetry) reflecting upon the joys and challenges of the craft, creativity and process of writing for children.
