**Third Grade Angels** Jerry Spinelli, 2012-09-01 The long-awaited prequel to the bestseller *FOURTH GRADE RATS* George, aka Suds, has just entered third grade, and he's heard the rhyme about first grade babies/second grade cats/third grade angels/fourth grade rats, but what does this mean for his school year? It means that his teacher, Mrs. Simms, will hold a competition every month to see which student deserves to be awarded the halo - which student is best-behaved, kindest to others, and, in short, perfect. Suds is determined to be the first to earn the halo, but he's finding the challenge of always being good to be more stressful than he had anticipated. Does he have to be good even outside of school? (Does he have to be nice to his annoying little sister?) And if Mrs. Simms doesn't actually see him doing a good deed, does it even count? A warm, funny return to elementary school from master storyteller Spinelli.

Hoodlum Movies Peter Stanfield,2018-07-13 From The Wild Angels in 1966 until its conclusion in 1972, the cycle of outlaw motorcycle films contained forty-odd formulaic examples. All but one were made by independent companies that specialized in producing exploitation movies for drive-ins, neighborhood theaters, and rundown inner city theaters. Despised by critics, but welcomed by exhibitors denied first-run films, these cheaply and quickly produced movies were made to appeal to audiences of mobile youths. The films are repetitive, formulaic, and eminently forgettable, but there is a story to tell about all of the above, and it is one worth hearing. Hoodlum Movies is not only about the films, its focus is on why and how these films were made, who they were made for, and how the cycle developed through the second half of the 1960s and came to a shuddering halt in 1972.

Thinking Practices in Mathematics and Science Learning James G. Greeno,Shelley V. Goldman,2013-04-03 The term used in the title of this volume--thinking practices--evokes questions that the authors of the chapters within it begin to answer: What are thinking practices? What would schools and other learning settings look like if they were organized for the learning of thinking practices? Are thinking practices general, or do they differ by disciplines? If there are differences, what implications do those differences have for how we organize teaching and learning? How do perspectives on learning, cognition, and culture affect the kinds of learning experiences children and adults have? This volume describes advances that have been made toward answering these questions. These advances involve several agendas, including increasing interdisciplinary communication and collaboration; reconciling research on cognition with research on teaching, learning, and school culture; and strengthening the connections between research and school practice. The term thinking practices is symbolic of a combination of theoretical perspectives that have contributed to the volume editors' understanding of how people learn, how they organize their thinking inside and across disciplines, and how school learning might be better organized. By touring through some of the perspectives on thinking and learning that have evolved into school learning designs, Greeno and Goldman begin to establish a frame for what they are calling thinking practices. This volume is a significant contribution to a topic that they believe will continue to emerge as a coherent body of scientific and educational research and practice.
