Britain and the Economic Problem of the Cold War Till Geiger, 2017-07-05 Examining aspects of the political economy and economic impact of British defence expenditure in the period of the first cold war (1945-1955), Britain and the Economic Problem of the Cold War challenges the widespread assumption that the British commitment to fighting the cold war precipitated the country's relative economic decline in the postwar period.

The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years, the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been. In a landmark analysis of the current state of Britain's regional development, Philip McCann utilises current statistics, examines historical trends and makes pertinent international comparisons to assess the state of the nation. The UK Regional-National Economic Problem brings attention to the highly centralised, top down governance structure that the UK deploys, and demonstrates that it is less than ideally placed to rectify these inequalities. The 'North-South' divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity, incomes, employment status and wealth. Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland, in contrast the Midlands, the North of England, Northern Ireland and Wales lag behind by most measures of prosperity. This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored. The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends, although this definitive study suggests that some areas of improvement are possible if they are well implemented. This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government.

**Methodology of Islamic Economics** Necmettin Kizilkaya,2019-11-05 In its pursuit to equip the reader with a basic knowledge of Islamic economics, this book divulges the micro-foundations of the discipline, and highlights the predominant schools of thought that exist in the field. It explains, in simple terms, what Islamic economics entails and how it can be studied as a science in relation to the Holy Quran, the Sunnah and the Islamic intellectual tradition based on these two sources. The book familiarizes the reader with knowledge of the basic maxims of the discipline. It then establishes the arguments that are presented by the proponents of religion-based economics, specifically Islam, and apprises readers about the aforementioned schools as they exist. A number of chapters consider the dimension of the dilemmas the discipline is facing, and the chronological progress of the field is reviewed, hence providing a comprehensive overview of the topic. The book deals with the issues about the origins of Islamic economics, the basic methodological questions, the use of the opportunities offered by fiqh in the methodological discussions and the main problems arising from the encounter with other cultures and civilizations. It offers practical solutions, despite the differing schools of thought, not unlike the development of conventional Economics where radical differences between Keynesian, Classical and Monetarist approaches existed. It concludes by incorporating some of the finest works that explain to the reader how Islamic economics may progress as a

discipline. This guide will provide both students and researchers in Comparative Economic Studies, Islamic Economics and Islamic Finance with an essential overview of the field.
