**Climate Change and Corporate Reporting in Europe** Nicola Moscariello,Michele Pizzo,2024-04-19 Diving into the crucial intersection of climate change and financial reporting, this book sheds light on the evolving landscape of climate-related reporting practices, exploring the regulatory framework, economic consequences, and determinants of disclosure in Europe. With a comprehensive approach, the book delves into the pivotal role of institutions and standard setters, such as the European Financial Reporting Advisory Group (EFRAG), the International Sustainability Standards Board (ISSB), and the Global Sustainability Standards Board (GSSB), in providing guidance and promoting consistency in reporting practices. Academic research forms a significant part of the contributions, but the inclusion of professional insights from various fields enriches the discussion, offering a well-rounded view of the current landscape. This collection not only contributes to the academic discourse on environmental reporting but also offers practical insights for regulators, policymakers, and businesses. It identifies areas for improvement and highlights best practices that can guide organizations in effectively addressing climate-related risks and opportunities.

Many of the intellectual roots of the treatment of uncertainty and risk in accounting can be found in other disciplines. The monograph, therefore, attempts to synthesize conceptual frameworks, and empirical findings from a variety of disciplines and relate them to developments in risk assessment in accounting. The conceptual framework which is developed should be useful for both practitioners and academics who would like to employ a broader perspective in viewing their own work in the field.
