Difficulties in Arabic-English Translation Omar Jabak, 2019-02-25 The book aims to explore the linguistic and cultural difficulties experienced by Saudi undergraduate students when they carry out translation from Arabic into English. Besides, it attempts to provide possible reasons behind these difficulties and offer some practical solutions to overcoming them.

A to Z of Arabic-English-Arabic Translation Ronak Husni, Daniel L. Newman, 2014-06-12 The A to Z highlights common pitfalls faced by translators working on both Arabic-English and English-Arabic texts. Each translation problem is carefully contextualized and illustrated with examples drawn from contemporary literature and the media. Using a comparative analysis approach, the authors discuss grammatical, lexical and semantic translation issues, and offer guidance regarding correct and idiomatic usage. A much-needed addition to the field for university-level students of translation and professional translators alike, the A to Z has been designed with a view to \* developing and honing skills in translating between Arabic and English \* enhancing idiomatic expression in both languages; \* raising awareness of problems specific to Arabic-English and English-Arabic translation; \* increasing competency by providing appropriate strategies for effective translation. Alphabetic arrangement of the entries ensures ease of use as both a manual and a reference work. As such, the A to Z is eminently suited for both independent and classroom use.

*Analysing English-Arabic Machine Translation* Zakaryia Almahasees, 2021-11-29 Machine Translation (MT) has become widely used throughout the world as a medium of communication between those who live in different countries and speak different languages. However, translation between distant languages constitutes a challenge for machines. Therefore, translation evaluation is poised to play a significant role in the process of designing and developing effective MT systems. This book evaluates three prominent MT systems, including Google Translate, Microsoft Translator, and Sakhr, each of which provides translation between English and Arabic. In the book Almahasees scrutinizes the capacity of the three systems in dealing with translation between English and Arabic in a large corpus taken from various domains, including the United Nation (UN), the World Health Organization (WHO), the Arab League, Petra News Agency reports, and two literary texts: The Old Man and the Sea and The Prophet. The evaluation covers holistic analysis to assess the output of the three systems in terms of Translation Automation User Society (TAUS) adequacy and fluency scales. The text also looks at error analysis to evaluate the systems' output in terms of orthography, lexis, grammar, and semantics at the entire-text level and in terms of

lexis, grammar, and semantics at the collocation level. The research findings contained within this volume provide important feedback about the capabilities of the three MT systems with respect to EnglishArabic translation and paves the way for further research on such an important topic. This book will be of interest to scholars and students of translation studies and translation technology.

**Handbook for Arabic Language Teaching Professionals in the 21st Century** Kassem Wahba,Zeinab A. Taha,Liz England,2014-06-03 This landmark volume offers an introduction to the field of teaching Arabic as a foreign or second language. Recent growth in student numbers and the demand for new and more diverse Arabic language programs of instruction have created a need that has outpaced the ability of teacher preparation programs to provide sufficient numbers of well-qualified professional teachers at the level of skill required. Arabic language program administrators anticipate that the increases in enrollment will continue into the next decades. More resources and more varied materials are seriously needed in Arabic teacher education and training. The goal of this Handbook is to address that need. The most significant feature of this volume is its pioneer role in approaching the field of Arabic language teaching from many different perspectives. It offers readers the opportunity to consider the role, status, and content of Arabic language teaching in the world today. The Handbook is intended as a resource to be used in building Arabic language and teacher education programs and in guiding future academic research. Thirty-four chapters authored by leaders in the field are organized around nine themes: \*Background of Arabic Language Teaching; \*Contexts of Arabic Language Teaching; \*Communicative Competence in Arabic; \*The Learners; \*Assessment; \*Technology Applications; \*Curriculum Development, Design, and Models; \*Arabic Language Program Administration and Management; and \*Planning for the Future of Arabic Language Learning and Teaching. The Handbook for Arabic Language Teaching Professionals in the 21st Century will benefit and be welcomed by Arabic language teacher educators and trainers, administrators, graduate students, and scholars around the world. It is intended to create dialogue among scholars and professionals in the field and in related fields--dialogue that will contribute to creating new models for curriculum and course design, materials and assessment tools, and ultimately, better instructional effectiveness for all Arabic learners everywhere, in both Arabic-speaking and non-Arabic speaking countries.
