The Case for Keto Gary Taubes, 2020-12-29 For fifty years, the medical establishment has preached the same rules for losing weight: restrict calories, eat less, and exercise more. Yet in that time, obesity in the United States has skyrocketed. So why has this prescription so clearly failed? Based on twenty years of investigative reporting and interviews with more than a hundred practicing physicians who embrace ketogenic (low-carbohydrate, high-fat) eating as the best formula for health, here bestselling author Gary Taubes puts the keto movement in the necessary historical and scientific perspective. He makes clear the vital misconceptions about obesity and diet (no, people do not become fat simply by eating too much or being sedentary; hormones play the critical role) and uses collected clinical experience from the medical community to provide much-needed practical advice on healthy eating. A groundbreaking manifesto for the fight against obesity and diabetes, in *The Case for Keto*, Taubes reveals why the established rules about eating healthfully might be the wrong approach to weight loss for most people, and how ketogenic diets can help many of us achieve and maintain a healthy weight for life.

Keto Maria Emmerich, 2018-01-09 The ketogenic diet has gained in popularity, but that has led to some bad information being shared. You can do keto right, and you can do keto wrong. This book is all about how to do keto the right way! Despite what health science has beaten into us over the last fifty or so years, humans thrive on high-fat, low-carb diets. Millions of people around the world have discovered that a ketogenic lifestyle is the key to weight loss, disease prevention and intervention, and a more vibrant life. Gone are the days of constant hunger and low energy. This book leads you on a path to better health, a slimmer waistline, elimination of cravings, and endless energy. Craig and Maria Emmerich have partnered to write a book that digs deep into the science of ketogenic dieting, explaining how dozens of diseases can be cured or controlled through keto and how ketogenic diets are fueling a new breed of athlete—all in an easy-to-understand way that breaks down the complicated science for you. Keto is the definitive resource to the ketogenic lifestyle. Inside, you'll learn • How you can beat cancer, obesity, metabolic syndrome, coronary artery disease, high cholesterol, Alzheimer's, dementia, ADHD, anxiety, and depression into submission by making some simple yet impactful changes to your diet • How cholesterol and diabetes medications could very well be making you sicker rather than better • How generations of bad advice—designed to sell sugar, not health—has killed millions who blindly trusted the medical community and, worse still, the government to tell them the truth • How overconsumption of carbohydrates is bad for your health and could be at the root of

what ails you • How changing your inputs—the foods you eat—can change your outputs, meaning your quality of life • How our bodies work, including oxidative priority, fat flux, and lipolysis, explained in such a way that everyone can understand how our bodies really process what we put into them • How inflammation is at the root of many diseases and how modern diets that are rife with sugar, carbs, and omega-6 oils are sending us to early graves • How hormones control mood swings, sex drive, blood sugar levels, muscle tone, fat-burning ability, metabolism, the immune system, and much more—and how adopting a ketogenic lifestyle can change your waistline and your life • How to stock your pantry with the right foods and make meal plans that are delicious and easy to follow and, most importantly, are the pathway to a longer, healthier life • How you can build muscle and perform at your best on a low-carb, high-fat diet (No, we're not making that up!) • Which foods are the most nutrient dense to feed our cells the vitamins and minerals they need • How to sort through the confusion and conflicting information about what a ketogenic diet is This book clears it all up, dispelling the myths of ketogenic diets. So, enjoy those healthy animal proteins. Gnaw on that rib bone. And say no to that plate of “heart-healthy” pasta. New York Times bestselling author Maria Emmerich and her husband, Craig, are going to take you on a journey to a new life—one that helps you lose weight, build muscle, and live the life nature intended you to live!
