

Modelos De Pronosticos E Inventarios

Universidad Central de Venezuela

Principles of Operations Management Jay H. Heizer, Barry Render, 2004 In this textbook, Heizer (business administration, Texas Lutheran U.) and Render (operations management, Rollins College) provide a broad introduction to the field of operations management. A sampling of topics includes operations strategy for competitive advantage, forecasting, design of goods and services, human resources, e-commerce, project management, inventory management, and maintenance. The CD-ROM contains video case studies, lecture notes, Excel OM and Extend software, and additional practice problems. Annotation copyrighted by Book News Inc., Portland, OR

METODOS CUANTITATIVOS PARA LOS NEGOCIOS Barry Render, MICHAEL E. AUTOR HANNA, Ralph M. Stair, Michael E. Hanna, 2006 Esta edición mantiene el enfoque en la aplicación de los modelos matemáticos en la toma de decisiones; el análisis cuantitativo consiste en definir un problema, desarrollar un modelo, adquirir datos de entrada, desarrollar una solución, probarla, analizar los resultados e implementarlos; para ello, el uso de QM para Windows, Excel QM y Excel permite elegir qué software funciona mejor.

Determinación de modelos de pronósticos e inventario para los ítemes de mayor relevancia económica en Petrox S.A. como base para optimizar el manejo y control de inventarios José Gacitúa Bustos, Universidad de Concepción. Facultad de Ingeniería. Departamento de Ingeniería de Sistemas, 1993

Optimización de cadenas de abastecimiento con base en aplicaciones reales: metodología, alcances, limitaciones y beneficios Carlos Julio Vidal Holguín, 2023-08-23 El libro presenta los desarrollos de varios casos reales entre 1999 y 2016, e incluye algunos resultados del proyecto de investigación titulado Modelos matemáticos V métodos de solución para la optimización de cadenas de abastecimiento internacionales con precios de transferencia, relacionado con uno de los casos industriales que se presentan. Este proyecto fue desarrollado dentro del grupo de investigación en Logística y Producción de la Universidad del Valle, con financiación de la Convocatoria Interna 2010, entre septiembre de 2010 y enero de 2013. Ha sido fundamental la transferencia de estas experiencias de extensión e investigación para enriquecer el proceso de enseñanza-aprendizaje y las estrategias de investigación tanto en los programas de pregrado como de posgrado. Se incluye una breve revisión de literatura sobre las cadenas de abastecimiento y los elementos básicos para su planeación y optimización. Relaciona además los problemas de localización de instalaciones con los problemas de optimización de cadenas

de abastecimiento y describe los principales requerimientos de información para poder aplicar modelos de optimización en el área. Los resultados de corto, mediano y largo plazo obtenidos en cada proyecto demuestran la gran utilidad de los modelos matemáticos aplicados para el mejoramiento del proceso de toma de decisiones, entre otras, para la optimización de cadenas de abastecimiento a todo nivel, lo que mejora la competitividad de las organizaciones, las cuales a su vez deberían transmitir dichos resultados a la sociedad.
