International Handbook of Mathematical Learning Difficulties Annemarie Fritz,Vitor Geraldi Haase,Pekka Räsänen,2019-01-30 This comprehensive volume provides teachers, researchers and education professionals with cutting edge knowledge developed in the last decades by the educational, behavioural and neurosciences, integrating cognitive, developmental and socioeconomic approaches to deal with the problems children face in learning mathematics. The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades, but the most part of this research has been conducted in non-applied settings and there's still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings. Now it's time to bring the results from the laboratory to the classroom.

Apart from bringing the theoretical discussions to educational settings, the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments. It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues. And it does so from an international perspective, dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world. All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society.

Fundamentos romanísticos del Derecho contemporáneo (Tomo III. Derecho de familia) Varios autores, 2021-06-01 En un momento de amplia discusión acerca del lugar que ocupa la materia del Derecho Romano y su recepción en Europa dentro de los planes de estudio de la licenciatura de derecho, en la primavera del año 1994, el catedrático e insigne romanista Don Justo García Sánchez tuvo la gran idea, junto con el profesor Don Gerardo Turiel de Castro (q.e.p.d), de poner en marcha un proyecto desde Oviedo, que perseguía un doble objetivo: 1) servir para una reunión anual de los romanistas iberoamericanos con convocatorias indistintas en la Península y en el continente Americano, 2) reunir diferentes estudios que enriquecieran los conocimientos relativos a la recepción del Derecho Romano. Fruto de este proyecto fue la constitución en Oviedo el día 22 de abril de 1994 de la Asociación Iberoamericana de Derecho Romano, cuyos fines son: a) El estudio y difusión del Derecho Romano, tanto en su sentido estricto, como en el ámbito de la tradición jurídica romanística y su proyección en la legislación europea e iberoamericana. b) La realización de todas las actividades conducentes al cumplimiento de dicho fin. c) El mantenimiento de relaciones científicas a través de congresos, seminarios, cursos y publicaciones. d) Cualquier otro tendente al cumplimiento de los fines de la asociación, y una particular colaboración con entidades jurídicas de España e Iberoamérica. Estos once tomos que ahora se presentan son un recopilatorio de las valiosas actas de la Asociación, fruto de la labor desarrollada en las reuniones mantenidas en los últimos años por expertos en la materia.
