Eternal Gold Tim Dilena,2024-09-26 To the athletes who have given body, soul, and mind to be the best in your field: It's our honor to care for your spirit for the next 30 days. "All good athletes train hard. They do it for a gold medal that tarnishes and fades. You're after one that's gold eternally." — 1 Corinthians 9:25, MSG I love the word convergence. At its simplest definition, it is when everything comes together. It is when the intense training, dieting, education, mentoring, and timing all come together. The goal is clear; the goal is simple. It's what every athlete hopes and prays for. That their converging moment will result in the prize! The challenge, however, for the Christian athlete goes far beyond the prize. Their ultimate recognition is not where they hear the national anthem but where they hear the voice of the Father say, "Well done, good and faithful servant" (Matthew 25:21, NIV). They understand the reality of their present race, event, match, or game—while at the same time, never losing sight of the greater race. The greater race does not converge around five circles but a crown of thorns. It is a race that started the day we were born. The victory was determined the day Jesus died and rose again. The finish line is crossed in heaven when we see Jesus face-to-face.

Won for All M. Ashburner, 2006 This is the story of the sequencing of the fly genome as told by one of the participants, Michael Ashburner. Written in a diary-like form, half the story is told in numerous footnotes. Ashburner has written a delightful, candid, irreverent, on-the-scene tale filled with eccentric personalities all focused on a single goal. The book also contains an Epilogue that puts *Drosophila* as a model system in historical context, and an Afterword that discusses the impact the genome sequence has had on the study of *Drosophila*. Also included are portraits by Lewis Miller of some of the principal characters. About the author: Michael Ashburner is Professor of Biology in the Department of Genetics at the University of Cambridge. By training and inclination, he is a *Drosophila* geneticist, although for more than a decade, he has not been where he belongs “the lab bench” but in front of computer screens. He spent six years at the European Bioinformatics Institute, first as the Institute's Research Programme Coordinator, and then as its Joint-Head. He is a Fellow of the Royal Society and an Honorary Foreign Member of the American Academy of Arts and Sciences.

Social Chemistry Marissa King, 2021-01-05 One of 2021's Most Highly Anticipated New Books—Newsweek One of The 20 Leadership Books to Read in 2020—Adam Grant One of The Best New Wellness Books Hitting Shelves in January 2021—Shape.com A Top Business Book for January 2021—Financial Times A Next Big Idea Club Nominee *Social Chemistry* will utterly transform the way you think about “networking.” Understanding the contours of your social network can dramatically enhance personal relationships, work life, and even your global impact. Are you an Expansionist, a Broker, or a Convener? The answer matters more than you think. . . . Yale professor Marissa King shows how anyone can build more meaningful and productive relationships based on insights from neuroscience, psychology, and network analytics. Conventional wisdom says it's the size of your network that matters, but social science research has proven there is more to it. King explains that the quality and structure of our relationships has the greatest impact on our personal and professional lives. As she shows, there are three basic types of networks, so readers can see the role they are already playing: Expansionist, Broker, or Convener. This network decoder enables readers to own their network style and modify it for better alignment with their life plans and values. High-quality connections in your social network strongly predict cognitive

functioning, emotional resilience, and satisfaction at work. A well-structured network is likely to boost the quality of your ideas, as well as your pay. Beyond the office, social connections are the lifeblood of our health and happiness. The compiled results from dozens of previous studies found that our social relationships have an effect on our likelihood of dying prematurely—equivalent to obesity or smoking. Rich stories of Expansionists like Vernon Jordan, Brokers like Yo-Yo Ma, and Conveners like Anna Wintour, as well as personal experiences from King's own world of connections, inform this warm, engaging, revelatory investigation into some of the most consequential decisions we can make about the trajectory of our lives.
