Dockworker Power Peter Cole, 2018-12-30 Philip Taft Labor History Book Award, Labor and Working-Class History Association (LAWCHA) and the Cornell ILR School, 2019 A Black Perspectives Best Black History Book of 2018 Dockworkers have power. Often missed in commentary on today's globalizing economy, workers in the world's ports can harness their role, at a strategic choke point, to promote their labor rights and social justice causes. Peter Cole brings such overlooked experiences to light in an eye-opening comparative study of Durban, South Africa, and the San Francisco Bay Area, California. Path-breaking research reveals how unions effected lasting change in some of the most far-reaching struggles of modern times. First, dockworkers in each city drew on longstanding radical traditions to promote racial equality. Second, they persevered when a new technology--container ships--sent a shockwave of layoffs through the industry. Finally, their commitment to black internationalism and leftist politics sparked transnational work stoppages to protest apartheid and authoritarianism. Dockworker Power not only brings to light surprising parallels in the experiences of dockers half a world away from each other. It also offers a new perspective on how workers can change their conditions and world.

The book also discusses the strengths and weaknesses of mixed methods designs, and provides an array of specific examples in a variety of disciplines, from psychology to nursing. The book closes with a brief section on how to teach and perform collaborative research using a mixed methods research design. Written so that it can be used either as a pedagogical tool or as a reference for researchers, the book is rich in examples and includes a glossary, easy-to-follow diagrams, and tables to help readers become more familiar with the language and controversies in this evolving area.
