Snore Wars! Dr. Michael Oko MBBS FRCS(Ed) FRCS (ORL-HNS), 2025-01-20 This book could save your relationship, your job, your health, and even your life. Sleep apnoea is one of the most dangerous and least understood of sleep disorders. But it's one everyone should be talking about, not least because its main symptom causes the biggest battle in the bedroom: snoring. Apnoea means the temporary cessation of breathing, and that's serious. It impacts the oxygen getting into your body, which affects the whole body, and puts your brain and heart particularly at risk. It's a (not-so-) silent epidemic. The

impact is devastating. Lack of sleep affects how we function: physically, mentally, and emotionally. And because snoring is so disruptive, the problem can be just as serious for the partner as for the snorer themselves. You deserve better – and so does your partner. Discover how to solve sleep apnoea and change everything. Dr Michael Oko is a leading consultant ENT specialist. He worked as an advisor on OSA for the Department of Health and in 2023 became a founding member of the All-Parliamentary Working Group as the ENTUK representative to advise the House of Lords and Parliament on sleep apnoea.

Promoting Inclusion Oral-Health Ruth E. Freeman, 2020-03-25 The aim of this collection of papers is to provide the reader with a cogent understanding of the role of evidence in the development of social or community-based interventions to promote inclusion oral-health and reduce oral health, health, and psychosocial inequities. In addition, this material will include various methods used for their implementation and evaluation. At the outset, the reader will be offered a working definition of inclusion oral-health, which will be modelled on the work of Luchenski et al. [1]. The interventions described are theoretically underpinned by a pluralistic definition of evidence-based practice [2] and the radical discourse of health promotion as postulated by Laverack and Labonte [3] and others [4,5]. This Special Issue will consist of eight papers, including an introduction. The first three papers will examine the various sources of evidence used to transform top-down into bottom-up community-based interventions for people experiencing homelessness; people in custody and for families residing in areas of high social deprivation. The final four papers will report on the implementation and evaluation of social or community-based interventions. This collection of research papers will highlight the importance of focusing on prevention and the adoption of a common risk factor agenda to tackle oral health, health and psychosocial inequities felt by those most excluded in our societies.
